### THIS ISSUE

 We've had some neat prizes to give away to the growing number of C+VG addicts in the past — but this issue we've gone completely O.I.I. on the competition front.

Thanks to Elite we've got a genuine COMMANDO arcade machine to give a way to the first prize winner in our great C+VG Chartbusters Competition.

C+VG Chartbusters Competition.

And that's not all. PSS, the people who brought you the hottest computer pinball game around for the Spectrum and Amstrad have come up with a REAL pinball machine for the winner of our

Design a Pinball competition.

So, if you want to turn your home into an arcade, you won't want to miss these two terrific competitions. There's tons of

want to miss these two terrific competitions. There's tons of software up for grabs too.

Goonles is going to be one of the big movies this Christmas

Goonles is going to be one of the big movies this Christmas and you could win tickets to go and see it — plus a Goonles treasure trove from **Datasoft** and **U.S. Gold**.

Once you've riped the issue apart to get at the entry coupon you can settle back to road Kelth Campbell's Book of Adventure REE Inside this cation packed issue. There're reviews, a big helping of the Adventure Helpline, features and, you guessed it, another competition. You could win a Goblin's personal stereo from Borad of the Rings.

Arcade Action hits you with a game that's going to take the arcades by storm. Called **Gauntlet** it's like nothing you've ever seen before.

How would you like to be blasted out of the sky by anti-aircraft guns?

Or perhaps you'd prefer to be vapourised by a Thargoid starship.

Or eaten for breakfast by mutant rats.

Well, you have all this and more to look forward to, if you get a Sinclair Spectrum +:

Because there are more games available for the Spectrum + than any other home computer.

(About 5,000 the last time we counted.)

Not all of which lead to such sticky ends, we might add.

You may, for instance, rather battle it out on the chess board with a Russian grand master. Or cross swords with Nick Faldo on the golf course.

You won't just have the pick of the current titles either.

You'll get first shot at the new ones too. Because most of them become available for the Spectrum + before anything else.

And because there are so many other Spectrum owners there are more books and magazines and clubs to join.

So if you get a Spectrum +, you may well end up in a Grand Prix pile-up.

And your chances of being killed by Gremlins are very high.

But you'll never die of boredom.

sinclair

Here are a couple of screen shots from an exciting new totally interactive graphic adventure "movie" soon to be released by Ariolasoft. Called Wild West it comes from the Hungarian Andromeda software team. It features some unique "zoom" techniques and much more. If you want to become a gun-toting Pale Rider, watch out for this one in your local computer store. It's extremely playable - believe us. Full review next month — plus a special feature on the software that's coming to you from behind the iron curtain. Don't

Following hot on the heels of Racing Destruction Set, Activision are soon to release their own racing game with a construction set called Fast Tracks.

The game is based on the original Scaletric slot car concept where you can build up any shaped track you like, and then race on it against your friends or, in this case, the computer. After loading, the player is asked to select between racing on one of the preset tracks that come with the program, or

come with the program, or designing a new one. If you decide to construct your own track, you are presented with a larger grid in a window on the right-hand side of the

screen, which scrolls over the whole area that can be built up. The left-hand third of the screen contains a verticallyscrolling menu which holds all the track eieces that can be

used to construct your circuit.
Actually constructing aircuit couldn't be easier. You simply move the cursive You simply move the cursive You simply move the cursive With the pystick to the track menu. Moving up or down causes the menu to scrib down causes the menu to scrib you find the piace you are looking for. Pressing fire picks up the chosen track and you can now move it to the construction window ready for placing.

When you find the right place, simply press the fire again and the track is placed on the map.

Fast Tracks lets you review the track you are building on a small scale, 2D view at any time.

Electric Dreams are also resureding Automata's innovative Daus Ex Machine program. Deus Ex Machine program. Deus Ex Machine aproper audio soundrack on a proper audio participa con the government of the gramma and a proper audio programma and programma an

British Telecom have proved to be real stick in the MUDs with their mago-interactive adventure. Technical problems are delaying the lounch of the first national demutitudes Dungeon game. The good news for existing subscribers is that they will still be guaranteed free credit for the trial period whenever it takes place.

has to pass through the user. This led to a "friendship treaty." Maybe they like us. If so, we have to create a comfortable environment to lure them out exclaimed Gold, who further postulated that the computer dwellers would probably know of and want, all the modern

nities of a modern hom DATELINE: JANUARY 9th 1985 Back in Mountain View. California, David Crane sets up the Activision Research Group

(ARG) to investigate strange forces inside computers **DATELINE: JANUARY 22nd** 

Crane hears of Gold's work and

they decide to join forces. Work begins in earnest to find the right environment in which the computer dwellers could feel at home. They begin working night and day on everything from furnishings to plumbing to electrical necessities for the

"home" they were creating DATELINE: JUNE 1st 1985 At last, after months of trial and error, the house on a disk is

finally ready to be loaded into the Apple. At first nothing happened. Then after agonising minutes the doorbell rang twice! It is very seldom that a

computer game can be called completely original. Yes, many are clever with original themes or game play elements - but strip away all the graphics and sound effects and, like us, most games are alike.

It is, therefore, a moment to savour when you actually load up a program that is totally unlike anything you have ever seen before. Activision's Little Computer People is such a program.

Imagine this guy, only one-inch tall, living in your computer, going about his daily life without a care in the world. Apparently, according to Activision, most computers are inhabited by Little Computer People (L.C.P.s) and each one is different.

With their 'House-on-a-Disk' you will be able to entice the L.C.P. into the house displayed on the screen.

What his name is or what the personality of your L.C.P. will be moves in, and you don't even know when that will be because some L.C.P's are more timid that

others What makes this program so refreshingly original idea, but the painstaking attention to detail in graphics, sound effects

and design. Combine this with the fact that every L.C.P will be different in some respect surely a first in computer software - and Activision have a sure-fire winner on their

hands. It even may prove as influential to future game design as Miner 2049er or Pacman

What you get! In what promises to be an

elegantly produced package you will get one CBM 64 floppy (tape version very likely to follow) containing one "house-on-a-disk". A full colour 14 page glossy magazine is also included which explains how L.C.P.s have a vote and pay taxes," while the Pentagon asks "Whose side are they on anyway?" The instruction manual tells

you all you need to know about looking after your L.C.P. and how to communicate with, feed, give presents to and scratch the head of your newly adopted friend. Loading your "House on a

Disk" for the first time. Having entered my name (you only ever have to do this once) and the date and time, I waited eagerly for my 1541 snaildrive to

cease whirling. Finally a beautifully designed but uninhabited house appeared. Three or four minutes passed with nothing happening, but then, just as I was about to try reloading, the doorbell rang! Moments later the door

opened and an unsure looking face peeked through. The face was followed by a body as my L.C.P. took his first few tentative

steps in his new home. During the next ten minutes or so the latest addition to my monitor set about exploring every nook and cranny of the house, opening a cupboard here

a drawer there, and even investigating the closet. Then suddenly, he left. "Maybe he doesn't like the

place," I thought. But a few minutes later he was back beaming from eye to eye, carrying a large grey suitcase He had even brought his dog!

My L.C.P. went straight up to his new bedroom and unpacked before going down to the kitchen for a snack and a drink of water from the cooler. Soon afterwards he went uostairs, sat down at his typwriter and wrote me a letter explaining how nice he thought the house was and shouldn't he really be paying rent? He signed

it Drew The typewriter is a good example of the meticulous attention to detail mentioned earlier. Drew sat facing me merrily typing away. At the same time the top of the screen showed a Drew's eye view of paper and typewriter carriage which move across the paper in perfect synchronisation with the actual typewriter he was using Even the sound effects of the keys hitting the paper and the

'end of line' bell sounded real Other features abound, such as Drew's hands moving in played on his piano, or the feeding of the dog. If you give Drew a can of dogfood, he'll go

over to the bowl to see if it needs filling.

If it is empty, he'll put half the tin in the bowl and the rest in the fridge, If, however, there is already some in the bowl then Drew will put the unopened tin in the cupboard until it is

With such a new concept, treated so beautifully, many forming long and meaningful relationships with their L.C.P. In

short, Activision have a real winner on their hands with this O The HOUSE ON A DISK

commercially available for the Little Computer People (L.C.P.) in your Commodore 64 RECREATION ROOM

Complete with TV. stereo and

well-tuned upright piano. All L.C.P.s are musically inclined but some are more gifted than others, L.C.Ps often relax in front of the box or practice their latest Travolta moves to the newest disco sounds on their stereo

What L.C.P.s.get up to in the

closet is one of the mysteries as yet unsolved by researchers. Recent data shows closet popularity is definitely on the increase

## AIRLIG

### Supplier: The Edge

Price: £9.95

"Huh! Just like Knight Lore," will probably be the most common phrase to pass cynical gamers' lips when they view the latest effort from The Edge. based in leafy Covent Garden.

Despite comparisons being odious, closer inspection will reveal a level of detail and precision which surpasses anything seen on a Spectrum before. Of course, sacrifices have to be made to incorporate such finery...

Loading proved no obstacle, and shortly an extremely pretty title screen appeared, along with a three-figure number in the lower left hand section of the screen. This number gradually decreases as the code is loaded, until it reaches QQQ, and a merry (if slightly lengthy) tune issues from the Speccy.

The plot is very long-winded so we'll leave out all the myth and magic and press on with game-play. A 3D picture of each location is presented, very much like the Ultimate games of late. The Edge have been making loud noises about a 'Worldmaker'' which was used

to create the environment, and comments about hype aside, it really is very good. You are presented as a fairly insignificant-looking fellow,

in four diagonal directions are accommodated along with iumping, object bandling and

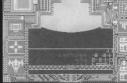

I was frustrated with the object routine. It seems impossible to push an object from one room to another. which is a definite problem if you find a chest obscuring a doorway after some fearsome

When the room is narrow matters are made increasingly difficult. You can't push the blasted chest out of the way. you can't pick it up, turn around and put it down somewhere

convenient. Doubtless you will find the offending object too heavy to carry without dropping a valuable item first!

There are lots of unfriendly people in the castle where most of the action takes place. Whirlwinds, knights, bubbles and hooded figures all wander around with seemingly nothing better to do than inflict severe physical damage on any passing

All-in-all, a great game. Certainly one for mapping freaks!

Price: £7.95

But if you are a thinking zapper, you'll take to Xcel like an alien to hyperspace. The basic idea of the game is this. Computers called Sentinals ompletely servile race domina-ind by the machines. You have tolen a spacecraft from the iceania Museum of Technology

nasties.
You have to hyperspace around the galaxy, visit planets find the Sentinal installations and destroy them. Sounds easier than it is.

## GAVE DEC SOFTWAR REVIEWS 4

### **GUY IN THE HAT**

- Machine: BBC
   Supplier: Blue Ribbon
- Supplier: Blue Ribbon
   Price: £2.50

This game reminded me of Blue Ribbon's Banana Man, which was a weaker version of the same idea. You are the Guy in the Hat.

You are the Guy in the Hat, and you stay alive by eating biscuits and dodging Bickie Bashers. When you eat a biscuit, the hexagon it was in changes colour. Bashers can't enter these hexagons, and if you do, you wapourize. It's more difficult to play than It's more difficult to play than

enter these hexagons, and if you do, you vapourize. It's more difficult to play than Banana Man, which is an improvement, and the enemies are much more fun — and harder to avoid. You can also fight back by dropping your hat

and changing a hexagon to white — do it when a Basher is in the hexagon and you bash him for lots of points.

There are more controls than usual for this type of game — in addition to up left, down left, up right and down right, you can also move left and right, hit space to drop you hat and 'hyperleap' by pressing return.

Blue Ribbon seems to acknowledge the limitations of the idea behind the game. Like Banana Man, a second game Secret Sam 2 is provided on the back of the cassette.

· Supplier: Gremlin Graphics Price £7.95 You are sacked, GET OUT!

Gilbert "Grumpy" aged detective at Mole Brothers Store, has had another bad day. But there's always another day There is enough going on in the 40 screens of Gremlin's

new game to make Grace Brothers in Are You Being Served? seem really dull. And it's not the normal game we've come to expect from

Gremlin. Supersleuth is a touch more sophisticated, a lot more infuriating and jolly addictive. The game invites comparisons

with Pyjamarama and the like and comes off well. Messages appear on the screen telling Grumpy what to do next. For example you may have to get the boss his tea, clear an invasion of ducks, put out fires, clear up floods or trap

an escaped gorilla.

With it he can move around

Fail to carry them out and you get a warning letter. Three letters and it's the sack. For you gamesters who love making maps, Supersleuth will put your skills to the test. Without one. you might as well give up. One hint, it's a good idea fo Grumpy to grab the skateboard

store very quickly.

 Machine: Amstrad Supplier: Bubble Bus •Price: £8.95

Beware of hasty judgements. I groaned inwardly at the thought of Hirise. Not another platform and ladders game.

However, some very nifty three dimensional graphics make Hirise a cut above the current crop being unleashed on the poor, unsuspecting public.

The story is simple. Builder Bob has a strike on his hands. But for him, work must carry on. He must work his way round the whole of the Miring building site painting each

The strikers have other ideas however, and set about chasing him. If they catch him, Bob loses a life Hirise is a simple game but it

is exceedingly hard and addictive to play. And with around 100 different screens to choose from, the game's challenge should last more than a few days.

Marble Madness, the mega-arcade game.
So what's the idea? Well, basically you have to guide a gyroscope — a spinning top type thing — down five different courses, avoiding

style landscapes with weel foliose and steps slopes. 
You must manoeuver you was a consistency of each course using the keyboard or each course using the keyboard or populsic. It is a difficult step or you have been and you'll need overy with — and you! ### BLUE MAX 2001

- Machines: CBM64Atari Supplier: U.S. Gold/Synsoft
- Price: £9.95 (cass) £14.95 (diek)

Remember Max Chatsworth, the daring air ace who took to the skies in his trusty bi-plane in Blue Max? Well he's back warped far into the future and out to save the world from the evil FURXXI

It's not really the same Max, it's alleged that this chan is a descendant of that first hero — but who cares? This Max has forsaken his bi-plane and takes to the skies in his deadly new Crayonic Penetrator — which sounds vaguely obscene. But then I've got that sort of mind.

You must land at rebel controlled bases to replenish your supplies of ammo and fuel before taking off for more of

the same! All in all, this game is about as boring as the first Max. The graphics are lifeless, for example your ship is a simple glittering

This game has no redeeming features. Save your pennies for Winter Games!

### Q-MAN'S BROTHER

- Machine: BBC · Supplier: Blue Ribbon
- Price: £2.50

As the title would suggest, this is a variation on Blue Ribbon's favourite Q-Man theme - the company's Screwball game is based on the same principle. Instead of a pyramid, you have a simplified version of the 3-D Munchy grid to move

around. As you move, squares change colour, and in theis version you have a time limit. When all the squares are changed, you move on to the

The opposition is not so imaginative - there's something else which not only chases you but changes any squares you've already altered back to their original colour, which is downright unfriendly of it.

If you've played Screwball and Q-man, there's not much here to hold your interest, and I found it considerably easier to play than the other two.

## G+VG DE Software REUF

- Machine: CBM 64 Supplier: Quicksilva
- Price £7.99

After having a tough time getting to the Toymaker's Party Rupert is back attempting to rescue his woodland pals from the *Ice Palace*. The latest Rupert game follows the hop, skip and jump format of the first. The graphics are as good as the original. Game play, despite the similarities to the first

release, is a bit harder The object of the game is to unfreeze Rupert's friends who include good old Edward Trunk and Bill Badger — who have been captured and stuck in

the freezer by Jack and Jenny Frost. Once he's defrosted his mates and taken them back to Nutwood Cottage, Rupert discovers that all his friends have left items of clothing behind. Just WHAT went on at the Toymaker's Party?

Still, being a good mate, upert sets off back to the Palace to pick up the discarded clothes. And if you thought it was tough rescuing Edward, Bill and the rest, wait until you try getting their clothes back. There's this evil snowman who keeps chucking snowballs at

Rupert has five lives or "ice pills" to help him complete the adventure. Once he's out of pills he turns blue and heads for home. He loses pills by tripping over various obstacles, getting hit by falling icicles or by making wrong moves.
It takes quite a lot of practice

to get through the first part of the game - saving your mates - without losing a life or two. And you really need all your pills to succeed in the second

### ELITE

### · Machine: Spectrum · Supplier: Firebird

Price: £14.95

Combine a strategy/trading game, a flight simulator, a space shoot'em-up and what have you got? The answer is, of course. Elite, originally for the BBC B from Acornsoft.

At the time, most frustrated C64 and Spectrum owners listened to BBC owners talk of the delights of having military lasers and being "Dangerous

but soon word came about that a bunch of bright young sparks called Firebird Software had gained the conversion rights.

So, what makes this game so special that it seems to sell on any machine? Well, it is highly lifetime's experience and an

station with 100 credits, a space ship called a Cobra MK III, and a rating of harmless and clean, these ratings are actually hoping to attain the ranks of

This is done by trading in a number of options available to range chart, several equipping and trade menus, and the ability of the compass through

Now you must select a planet from your short range chart then find out its details. This will help you select goods for

trading (this is logical so I'm not going to give you any clues). Also, the state of the government is an indicator of

you're taking, you're off. Overall, a really good game The Spectrum version is slightly version but not quite as fast as the BBC. Some of the missions conserve memory and there aren't so many graphic tricks as in the C64 but still worth every

penny of the £14.95 you will have to fork out. This is definitely a game that should be without. Take my won't be seen for six months

# When it comes to computer games you can't beat an Amstrad.

We've enlisted the help of some particularly wicked program designers to put our entertainment software range together.

They've come up with over 200 Arcade and Adventure games. Many of them exclusive to Amstrad (like

those shown above). All of them mindbenders you'll find hard to beat.

And all at prices that are as competitive as the games, from £12.95 on disc and £8.95 on tape.

But the software is only one of many good reasons for buying an Amstrad computer.

The 64k CPC 464 computer comes complete with built-in datacorder and a choice of green screen or full colour monitor.

The CPC 6128 is a big memory 128k computer with built-in, fast-loading disc

drive and again, it's own colour monitor or green screen.

Both are available at an all-inclusive price you'll find hard to match.

In fact, with Amstrad's unbeatable software, unbeatable hardware and unbeatable prices, how can you lose?

#### **HOTSHOTS**

To your marks, Get ready. Get set. GO! And another C+WG Hot Shot of the month challenge is underway. September's nominated game was Hypersports by Imagine for the Commodore 64.

The sporting stars taking part were Brian Baso, 14, of Brackley, Northants, and Scott Mellors, 15, of Greenford in Middlesex.

ARY

NIC

As fans of the game will know, the sports featured are swimming, skeet shooting, long horse, archery, the triple jump and weight-lifting.

All require good hand and eye co-ordination, fast reactions

and strength to survive marathon joystick-wiggling sessions.

The contest was set to be fought over the best of five rounds.

Scott won the toss and put Brian in first.

Brian hit form straightaway scoring a healthy 51,884. Scott countered with 46,608. Round two saw Brian consolidate his lead with a 50,622 to 48,906 victory.

Suddenly Scott was facing the crunch. To stay in the contest he had to win round three. But it was not to be.

Both Brian and Scott agreed the contest was won and lost in the skeet shooting round. Brian scored well but Scott was off

target.
"I lost about 4,000 points on the skeet shoot." said Scott. "I'm usually rather good at it."

to the right as soon as you Take off

With a space helmet you receive an extra life and five gravity sticks. When placed. these sticks have the effect of making your enemies in the room blow up.

• STARION

The winner of the Star Hint this month is Kevin Murray of Bonff. His Pokes are for the ZX Spectrum and the first one up is for Starion. Kevin reckons that the most difficult aspect of Starion was getting it to stop as it has a machine code loader. Eventually he worked out how to overcome this problem. LOAD CODE - this will miss

out the basic program and load the machine code loader. POKE 23300.3:POKE 23301.19

tells the loader to jump to a ROM, then return to basis when it's finished loading RANDOMIZE USR 23296 - runs

the marking rade loader When the game has finished loading, type the following pokes for infinite lives. POKE 46527,0:POKE

46528.0-POKE 46529.0. Run the game by typing RANDOMIZE USR 32835. One final one from Kevin, for

the game Arcadia. MERGE -Edit line 10 and put the following Pokes just before the PRINT USR 24577, POKE 25776.0 Infinite lives. POKE 27339 timer value, POKE 27334 number of lives you wish to start with minus one. Then RUN.

PSYTRON

More Spectrum Pokes from Saleem Ahmad of Birminaham Psytron - Type MERGE and when it comes up OK, stop the tape. If you want endless fuel, type POKE 28625,0:POKE 28626,0. For endless men type POKE 41098,17:POKE 41099,2: POKE 41100,1:POKE 41101.0. And for endless oxygen, type POKE AUG AS-POKESAUG SSS POKE 26144. Start tape.

Well Kalliber. I'm not very pleased with that lot. What happened to all the pokes for the other computers? I want to see a big improvement by next month, get those lazy droids to work

 COMMODORE Audiogenic have devised these for the 64 version of Graham Gooch's Test Cricket. They have asked us to pass them on to you. They will enable you to save the teams that you have created onto tape or disk and so avoid having to type it all in ogoin.

Load and run the SELECT program, then enter the teams as normal. At the end, when the program exits to Basic, enter the following POKE43 U BOKE44 103 POKE45,40:POKE46,194 POKE56,200:CLR:SAVE TEAMS

(,8 if using disk), When the teams have been saved, switch the 64 off and then on again to reset the pointers, then load the teams by entering the following LOAD TEAMS 1.1 (or.8.1 if using disk). When the teams have loaded, enter NEW and then

load the main game program. VIC 20 Mario Richard of Rochdole has these Pokes for the Vic 20 which will allow you extra

lives. For 200 lives on Multitron: Verify the loader, then type LOAD. After the main part has loaded, enter POKE 4516.20:SYS

Micky the Bricky: For 100 lives - load the whole

program and then reset the Vic by touching pins 1 and 3 of the user port with a piece of wire. Type POKE 4129 100-SYS 4100 For 200 men on Gridrunne Reset the computer after loading the game and ente

POKE 7045,200:SYS 7076. Finally for nine lives on Allen Blitz: Load the game and reset the Vic. Then type POKE 6082,100:SYS 4110.

SCHIZOFRENIA The following playing tips have

me to IDEAS CENTRAL. My name is Melissa Rave I.C. co-ordinator. IDEAS CENTRAL is where you'll find the Bug ters' HQ and the man who keeps those rogue robots in order — Jackson T. Kalliber

order — Jackson K. Kaltneer.

Jackson makes sure OTISS, Big Red, X and B-Con get out
there to find the hints, tips and pokes you all so desperately
need for a happy existence. Don't tell them — but I can't rely
on them to make a good job of II. So the IDEAS.

CORPORATION and yours truly, Melissa R., need YOUR help. Remember, the IDEAS CORP will pay a large amount of credi to anyone assisting our enquiries. So send your game hints and cheats to Melissa Ravenflame, IDEAS CENTRAL, Compute + Video Games, Priory Court, 30-32 Ferringdon Lane, Londo ECIR 3AU. Now — let's take a look at what the BH squad have come up with . . .

#### POKES

Right, no messing about this month. It's straight down to business to see what the BH Squad have managed to discover

Anthony Roper of Porthcawl has come up with some hints for Nodes for the Spectrum Use them with the Book of Maps from last issue

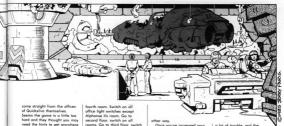

How to catch moles: When you begin the game you will find craters on the surface of the moon. Every now and then a mole will pop its head out. When it does, jump towards it. You may have to wait quite a while for a male to pop up, but it is worth it as he is a

powerful ally. When entering a room use the mole to scan the sides of the wall. If he begins to eat the rock then he has found a male hale

In some rooms, instead of the usual nasties, you will meet

cyclone types. These will transport you to other rooms False floors can be detected by fireballs, they will only appear over an open space

In rooms E2-E7, you will find the draughts. These will carry you safely down five screens. However, if you jump up, you will hit the roof and fall back down to your death. To prevent this you must push the joystick

need the hints to get anywhere in the game. So read on and see what you can make of it.

Screen one: Follow inse II very closely, pull top bolts, then go downstairs behind him. Pull bottom bolts. then go upstairs to the right hand lever. Pull this when Alphonse II is as close to the top right of screen as possible. Go down the stairs and through the door before

Alphonse II closes it. Screen two: Build the hottom hoves into stens to reach the lift buttons. Press buttons and jump into lift. Go to top floor. Put top floor boxes into right hand lift and send it down. Go to middle floor and unload all boxes onto right hand ledge. Go to bottom floor on left and load boxes onto right hand lift. Ascend to middle floor on left hand lift Load boxes onto the third lift three at a time. Send lift to ground floor. Go upstairs and call lift. To unload boxes merely walk into lift. To climb baxes, move toes over bottom of box and press fire.

Screen three: To move the cleaner merely walk over it. To clean a lift, place the cleane outside, lean and pull. The lifts are ganged in two sets of three: only those with flashing lights will move. Lifts on the middle floor will continue to move in the direction they last moved in.

Screen four: First turn on the generator (bottom floor) by finding the switch pattern (the switches must be pulled in sequence or all will switch off again). The generator sequence will also prepare the exit door for opening. Do this next. Get three switches to rooms on second floor into down position. Switch on

corresponding switches on top floor. If a switched-on room stays dark then Alphonse II is in there; otherwise he is in the

rooms. Go to third floor, switch on Alphonse II's room and race

Screen five: The X/Y controls are already off (did you notice that?). Turn on generator and master switches Go to second floor, open chamber door. Go to lower floor and turn on pulse charger Meanwhile Alphonse Il will grab the lift, Call it back when he is on the right hand side of the second floor. Use the UDLR switches to move pulse generator markers to coincide over chamber door Get Alphonse II in front of the chamber and fire pulse generator. Get into lift, as to second floor and shut chamber doors. Use the UDLR to zero pulse generator marker counts Switch off UDLR controls. Use V and H switches to set marker counts to target area (about 30 and 10) Switch on second floor and around floor autoswitch. Get up to chamber and inside with Alphonse II (use the quick entry button) and wait!

It seems that the Commodore version of Elite is making just as big a splash in that galactic ocean as the original BBC version. We've been receiving plenty of tips and enquiries about the game, so I thought I'd let you in on a few of the

The first thing you'll want to do is make credits - late of them. To do this, you should first of all find two adjacent planets of the right type. One should be Poor Agricultural.

and the other Rich Industrial. I seem to remember that there are a couple of these about ten light years to the galactic east of Lave (your starting planet) — Quitiri rings a bell for one of them. You can then travel between these taking computers to the garicultural planet and furs the

Once you've increased you cargo capacity (one of the first things you should buy) and have a little extra cash on these runs, it's always a good idea to load up with gold, platinum and aems when they're cheap on the

agricultural world. They don't take up any cargo space, so you can carry them around until you find a good price. If you accumulate vast quantities of these, don't sell them all at once, but instead answer 9' to the 'Do you want to sell (v/n)?

There's still a bug in the game (left over from the BBC version) which misses significant digits in large

calculations. Of course it's no good knowing how to trade if you keep scroping your ship when docking. This is really just a matter of experience, but here are a few tips for novice pilots. When you have a visual sighting on the station, aim for a point directly midway between the station and its

closest point on the planet. When doing this, impaine a line running between the station and the planet, and make sure that this is horizontal. Now move forward If all has gone well, you should eventually see a green dat appear on your radar. You can now look either right or left depending upon the direction of your approach — and you'll see the space station. Stop the ship when the entry port is

Now look forward, rotate the ship so that the station is above you (vertical line in the middle of the rodor), then turn upwards. The snace station will come into view and, apart from a few minor adjustments, you should dock successfully

Now to those friendly/furry cuddly/cute and fertile little Trumbles. They've been cousing a lot of trouble, and the obvious eviction routine of using the escape pod doesn't work. Somehow, one of the Trumbles manages to survive in a way reminiscent of Allen,

and haunts you in future ships. It's not much fun when you can't see what you're doing, but the trick is to aim for the brightest point in the sky. Know what I mean!?

Unlike its predecessor, the Commodore version of Flite doesn't reward random killing very highly. You've got to choose the right ships with the highest points if you want to get anywhere. Of all the ships. the Thargoids seem to be worth the most. I'm told that they score five points each, and you need 256 points to get a Right On Commander" at the higher levels. So, wouldn't it be useful to go through Witch-Space — where these beasties hang out - on every hyperspace jump?

Thanks to a number of readers, I can tell you how to

Having left the space statio freeze the game, press the X' key and then unfreeze the game. Everything should now continue as normal. So, set the hyperspace vector to a nearby

press 'H' for hyperspace. As soon as you have done

this, hold down the 'CTRL' key You'll enter hyperspace, and 99% of the time continue to Witch-space.

Finally, a note about the missions. We've had more enquiries about these than anything. Unfortunately Firebird tell me that this version only has the two missions also found on the BBC. They promise me that the Spectrum version will have solace to Commodore owners

#### HELP!!

Russell Jones and Thomas Lilley from Great Yarmouth are tearing their hair out trying to get out of the North Door at the beginning of Witches Cauldron. They also need help to get rid of Mactuper, because after throwing the soot over their shoulders Mactuper eats

#### SUMMER GAMES

Once again Ideas Corp informer Kenneth Henry has written in with tips for his fellow readers. The game to be given the Henry' breakdown this time is Summer Games II.

Triple Jump: When you have formed two movements for hop and step, don't bother to nush left and then quickly forward to jump because vo run the risk of getting a fault. Simply push the stick up/left, Javelin: Hammer the fire buttons. When selecting the angle be careful to allow for the little jump the man makes when he throws. If you have a Quickshot II, switch on the autofice and select a middle range angle. But remember to allow for that little jump or you will get a fault.

Equestrian: Keep pushing the joystick up for speed. In the middle of a jumps push the fall off, press fire and build up speed for the other jumps Approach with speed or you

will get a refusal, especially with the jump which consists of crossed poles and a small gate after it. There are two of these on the course, plus a double iumn and two water-iumns Remember, some of these appear in quick succession. Practice and you will eventually

get around the course without falls or refusals. Fencing: Not as difficult as it looks. Best time to get the droid is while his guard is up Otherwise stop the computer's

quick lunges by blocking, then lunge the droid for a hit Cycling: The only tip here is not to go faster than the arrow guide at the bottom of the screen or you will slow up to such an extent that you might lose the roce

Kayaking: Reverse gate six how do you do it? Easy, after going through gate five make a sharp turn right and face backwards. Then go through. It's the same for reverse gate 13.

#### CHEATS

Now for a few 'cheat modes' from Commodore owner Paul

Stamp of Cleveland. Thing On A Spring: When the title page is shown, press the keys. T.H.I.N.G.Inst Del and Left arrow all simultaneously When this is done, the border should go grey and you get

Zaxxon: Again on the title creen, type in RED for indestructible ships.

Booty: The keys K.E.V.I.N. must be pressed simultaneously to get unlimited lives. Revenge of the Mutant

Camels: On the title poo type in "goats". This should reveal a message saying "Chent mode operative" Then on any screen, pressing space will allow you to proceed to the next screen.

#### MORE HELP

48K Spectrum

chronicles of the land of fairlight 1. a prelude: the light revealed

#### By BO JANGEBORG (author of 'The Artist')

"Maybe the game of the year!"

"... one of the most sophisticated games the Spectrum has ever seen."
"... one of the ten best programs ever made for the Spectrum."

"... the best arcade adventure of the year."
Your Spectrum, November 1985

Which game makes Beach Head look like a Sunday School outing? Which greade machine has been causing as much of a stir in the arcades as Space Invaders? COMMANDO that's what. To celebrate the release

of their official Commando games on the Spectrum and C64 ELITE software is offering a genuine Capcom Commando arcade machine to the winner of this exclusive C+VG competition.

Yes, one of these smash hit machines could be yours to play in the privacy of you own home. No more embarrassing moments when you start shouting and screaming and jumping up and down as you get near that all time high score!

The first prize winner vill also get a copy of the Elite Commando game for his or her computer, plus a special combat issue Big Rod t.shirt

What you have to do is so simple we might as well be giving this amazing machine away. All you have to do is predict the highest chart position YOU think Elite's Commando Game will reach in the C+VG/Callup Top 30. That's

Tell us if you think it will get into the top 20, top ten or even number one. Even Big Red could have a crack at this one!

Once you've decided, all you have to do is fill in the coupon and send it to us at C+VG. Then you'll have to watch the charts to discover if your guess was right. We'll be closing the competition on January 16th - so, you've got to allow for two months of sales. The first person out of the mailbag with the nearest guess gets the prize.

Elite have a good reputation for producing chart games - so bear that in mind when you come to make your guess.

Fifty runners-up will get a copy of the game for the Spectrum or C64. Don't

forget to tell us which machine you own. Mail your entry to Computer and Video Games, Commando Competition, Priory Court, 30-32 Farringdon Lane, London ECIR 3AU. Remember the closing date is JANUARY 16th.

#### THE GAME

highly trained soldier. He's been game with plenty of thrills for sent on a seemingly impossible the computer gamester. one man mission to rescue hostages from an enemy faithfully the excitement of the

stonghold. Who needs this arcade original both in game Outnumbered by enemy and if you've seen the arcade troops and armed only with a game, you'll know that's machine gun, and the odd impressive.

grenade he manages to find on save his hostages.

Elite's version follows

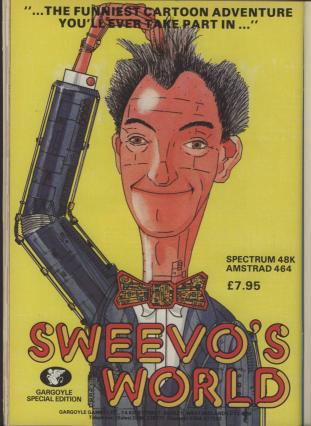

A copy of this instant smash mega-competition!

#### C+VG/ELITE COMMANDO COMPETITION

I think Elite's Commando game will reach number ... in the C+VG/Gallup Top 30.

# **PINBALL** COMPETITION

A pinball machine of your very own? Yes — C+VG and PSS can make your dream come true!

Indians to the people who brought you Macadam Bumper — the best Spectrum computer pinhall simulation around — we can offer you the chance to win a real Meteor pinhall machine. And 25 runnersup will be able to choose ANY PSS game for their computer. Now there's an

What do you have to do? Simple, Just use the C+VG pimball construction set to design the perfect pinball playfield. On this page you'll find all the bits and pieces you need to construct a pin-table. There are flippers, bumpers, shoots — in fact all you need to make a great table.

You can either cut the bits out and stick them on a piece of paper or card or draw your own, or simply make a photocopy of the page if you don't vant to spoil your issue. You could even buy inother copy — then we ould afford to fix Big Red's vonky eye!

If you like, you could also a have a go at designing a back-flash for you pinball—you know, the amazing artwork that often appears around the bit where the scores flash up! Give your pinball a name, too. The more original it is

the better.
Let your imagination run
riot and create a pinball
for the video age!
Closing date for the
competition is December

Closing date for the competition is December 16th, normal C+VG competition rules apply and the editor's decision is final

Don't forget to fill in the coupon and attach it to your entry which should be addressed to Computer and Video Games, Pinball Competition, Priory Court, 30-32, Farringdon Lane, London, ECIR 3AU.

## Highway Encounter

tuck on the road of no return? Never fear — C+VO is here to help keep right on to the end with our special screen by screen playing guide to Highway Encounter — one of the hottest games around for the Spectrum and Amstrad right now, Dimension Graphics supplied the screens while our very own highway patrol man MARCUS JEFFERY, brings you some useful alien bashing tips to help you save the world.

#### ZONE 30:

The beginning of the road. No trouble here. Your Vortons form a line and move forward. It's a good idea to move to one side and start shooting forward to clear a barrel from the line in the next zone.

next zone.
ZONE 29:

Your first alien will be waiting for you, but on the other side of the barrels. If you've cleared a barrel as suggested, you'll have no problem getting rid of him. Leave the Lesertron and your extra lives here for a while and go it

ZONE 28:

Enter this zone just to the right of contro. Three one-yead beastles will come straight at you down the centre of the need. If you've been firing as you enter, you'll hit the rightmost and, if you've backy, the centre one as well. Then just rotate left to finish the job. ZONE 27.

Nothing here. You can't budge the glass towers, but the Lasertron will fit betwen them anyway:

betwen them anyway.

ZONE 26:
The first major obstacle. The two

The text major obstacle. The two mines can't be moved, so you've got to use the barriels to carb (whoops — a pund) their destructive tendencies. The two blocks will disintegrate under fire. Beware of two monstronities which will attack you on this serven. It's a good attack you on this serven, It's a good aften to kill these before mossing about with the burries, but don't stray into the next zone, or you're likely to the next zone, or you're likely to

#### attract an even more unruly bunch.

Nothing here, but you may like to use the burrel or blocks as protection in the next zone. The leftmost block is nice cover. Just keep firing down the left hand edge, and it II come to a stop in Zone 24. Then just saunter up behind it, turn, and start blasting.

This is where you meet the first major resistance. Stay back to keep clear a line of sight and lay into 'em.

A repeat performance here, with plenty

of nassies attacking. Don't worry about freeing the enclosed mine in the centre — you'll have to do it eventually anyway. When the aliens are clear, use one of the blocks to push the mine against the wall. Also, don't forget to move the barrel from the centre of the rood — the Leaverton is counting on

ONE 22:

Nothing nasty here, but take care to enter the zone either in the centre or the right. Many a vorton has come to grief in the fire.

ZONE 21:
This is the start of the next shoot-out.

Plan carefully, entering down the centre line with laser blazing. This will push the two centre barrels to block the passageway into Zone 20 then either sit at the side or move one of the barrels into the next zone to finish off the halfdozen aliens. Again, don't forget to move that barrel from the centre.

There'll be three more of those loudmouthed aliens lying in wait for you here. This horrific cross-breed between Jaws and a beach ball will die eessly if you just sit back, relax and pick 'em off.

ZONE 19:

You've just reached the first major checkpoint. Congratulations! But den't get carried sway and blast down the wood between the first. It's not doing you any harm, and provides an encellent stopping point for the Lasertree at a later stage. In addition, if the Works not? EXACTIV control

you'll die.

ZONE 18:
Barrel moving time again. You cely

need one barrel, two are provided if you find this quicker. ZONE IT: Just for a little variation, this serven

Just for a little variation, this screen requires block moves — isn't that a Z80 machine code instruction!? ZONE 16:

Peek-a-bon. There's a saucer hiding in it there. I've sometimes managed to kill it straight off — I've still no idea how — but normally you should budge one of the side blocks (one shot only!) then line up down the diagonal to slaughter the offender.

Now comes the real crunch. This screen can be pretty tough. Fools rush in, but the rest of us might consider using the

blocks from the previous zone as protection.

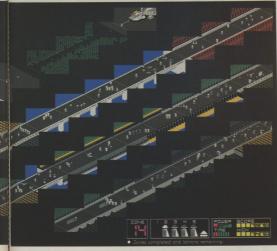

Full steam ahead, but take care in case one or two stragglers haven't bitten the dust from the previous shoot-out. ZONE 18. Hold your horses. It's no good rushing

through here. You'll need these barrels in the next zone. One or two carefully controlled zudges should line them all up, then take them all together. ZONE 19.

Remember: Mines can be dangerous to your health, and these diagonal ones are not exception. Just stay cool and it's really quite easy.

ZONE 11: One of the meanest zones yet. The aliens just keep coming. There are

aliens just keep coming. There are a couple of barriers providing much needed protection. The first couple are just those one-eyed freaks who move in a straight line until they hit something.

tactics normally pay dividends.

ZONE 10:
A real barrier of blocks controls the

road. You may like to leave a centre block to stop the Lasertron depending on your situation — but don't forget to take one block with you

for later use.

ZONE 9:
These three barrels are also needed, but

there're one or two big mouths to fill with laser shot first.

ZONE &

This is what the harrels are for. I hope

you remembered to bring along the block to help out!

Just as you thought things were getting easy. There are plenty of deastardly drivers to keep you occupied and a couple of horrors in the centre. When you've finished off the former, you're going to have to let the others out if you want to clear the centre. A little diagonal blasting will also deal

with those mines. Whatever you do, don't forget to take one of those blocks with you.

Nothing in sight. The best bet is to blast the block just past the marked squares in the next zone, then move up to it.

to it.

You'll be immediately set upon by swarms of one-yed wonders, which come hurting down both sides of the road. Fortunately, they're as stupid as ever, so you should be able to pick them off. Then deal with that mine — yes, that's what the block's for. Trap the mine on the left-hand side, or the Lawstern worth fit through otherwise.

It's the OK Corral again. Lots of saucers — the meanest in the bunch to keep you amused.

Take these barrels!

The greatest multitude of malicious cks mines yet. Use the barrels to let yourself through. Then rush to the next screen for help.

ZONE 1: The end of the road at last. But the saucers don't think so. Having taken care of these, you'll notice a few barrels just hanging about waiting to be used

just hanging about v in the previous zone. ZONE &

The Lasertom has made it, with just seconds after out to edox. It his the final fire barrier and ALL YOUR WORDTON SIDSINFEGRATEM!" I had a hart-teloping moment, until a little message appeared soping "Lasertom Activacia", and it moved forward. The Laserton obviously has a great time humming to itself as the alless look on in horre. The aller aspeached poulses, then disappears under the oreshapht. These an insignificant little message that

PREPARE FOR YOUR NEXT

HIGHWAY ENCOUNTER and it starts all over again. Is it my imagination, or are the aliens getting quicker this time?

Don't serry about the time to begin with. Just work out the quickest method of clearing each screen. The time factor is usually the most important in the end, but you've got to know what you've cloting. NEVER, never, go book for the Lasertiren. Unless you are on your last life and are taking the Lasertiren along with you. Remember the time —

martyrdom is much quicker.

on, blasting everything in sight. When you lose a life, if you've reached one of the safe points, you can take the Lasertron and all the spare Vortons along the road together, saving valuable time.

END

## REA

#### Commodore 64K

Explore 232 rooms collecting treasure and killing off nasties in the excellent **Necromancer's Realm** 

And here is a poem from Carl which should help you. An Amulet was split in twain. Here you see it yet again

The Necromancer hid it well Be careful of his deadly spell. A map, you'll find, may come in handy Beware the Boomer, Wizard's dandy

If a bird is troubling you Kill it with a bow of yew But be silent, stealth is needed. My advice is to be heeded. Transport, find, and return thence to the place you came from hence. Verse and prose come naturally When you kill, kill less than three

You have three lives and various weapons can be found to help you. A long listing, but worth typing in. When typing in this

listing, remember anything in brackets is a control key. By Carl Muller

#### Spectrum

Don't be fooled by the apparent simplicity of Drip Drop. The game becomes progressively more difficult and addictive.

The aim of the game is to control a robot to catch falling drops of water. Easy enough until one drop of water becomes two and then three. And, to complicate matters, each drip drops at varying speeds.

The listing is in two parts. Type and save program one, then type in program two separately and save it on tape after

two separately and save it on tape after the first.

The listing includes graphic instructions which are underlined. Type any underlined character or digit in graphics

mode (CAPS SHIFT + '9'). A digit may be preceded by 'sh'. In this case hold down a shift key when typing it. Other underlined instructions are shown in

brackets.
Control keys are Q for left and P for

## After 17 visits to the Pleasuredome. the novelty was wearing off.

That's the problem with most computer games However thrilling they are at first, eventually you master the tactics and the attraction begins to wane. You need a fresh challenge, but with games costing £8 plus, most of us can't afford to buy new titles every week

ng your software from the Matrix Club provides the solution. Our members enjoy a wide selection of games which includes the very latest titles

Life membership of the club costs only £6 and hire fees start from as little as 60p a game per week. Complete the form below or write for full details of our service without obligation, and very soon you'll be playing your favourite games at a fraction of the normal cost.

## Software Houses Opportunities in Japan

We are looking for the top games manufacturers to convert their titles to the MSX computer. We want to import computer games software — finished products only — for the Japanese users.

We are looking for Importer/Wholesalers/ Dealers who are interested in importing stocks of MSX computer games made in Japan to the U.K.

We're looking for Importer/Wholesalers/ Dealers who are interested in importing USED MSX COMPUTER machines made in Japan.

VIC 20 3.5K

In Truckie you travel down the screen avoiding pillarboxes, lamposts and the edge of the road by using the key Z for left and C for right.

Use the Space Bar to pause the game and Return to quit.

When you reach a score of 2.500 darkness falls and

it won't get light again until 4,500. The listing is in two parts, type and save program one, then type and save program two separately.

Any words inside square brackets eg [HOME]— represent control keys and will be shown on the screen as a graphics symbol.

Some parts of the program look rather odd — for example in program one lines 230,240, etc. These are correct and should be typed in as shown in the listing. Remember words immediately enclosed in matching square bracket represent control keys.

### COMPETITION

Thunderbirds are Go! Yes, the puppet heroes of International Rescue are back in action — this time in a new computer

game from Firebird Software. Thunderbirds was a highly popular television series which started in the mid-1960s. Repeats are still shown from time to time.

Each week viewers thrilled to the exploits of the five Tracey brothers and their friends Lady Penelope, Parker and Brains who ran a private rescue service, saving the world again and again from doom and disaster. When all seemed lost International Rescue, in their five wonderful Thunderbird craft, would be called in. No job was too difficult for them.

Thunderbirds was created by the imaginative Gerry Anderson, who was responsible for many other smash hit pet shows such as Supercar, Fireball XL5, Stingray, Joe 90. Captain Scarlett and more recently Terrahawks.

Now Thunderbirds One and Two are back in action in Firebird's new game. Their mission: to rescue a team of egyptologists trapped deep inside a tomb. The game oines maze complexity and strategy as the two Thunderbirds move deeper into the tomb

Now is your chance to join in the rescue action in a great petition from Computer + Video Games and Firebird. We've got 25 of the new games as prizes for you to win. All you have to do is answer the three questions below and fill in the tiebreaker to be in with a chance to win.

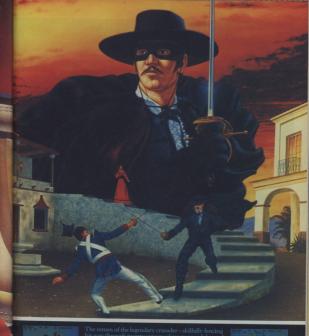

- 1) What colour is Lady Penelope's Rolls Royce?
- 2) Name three of the five Tracey brothers and which Thunderbird craft they are associated with?

3) Where is Thunderbird One's launch pad hidden? Tie breaker: In no more than 20 words, say which one of the Thunderbird characters you would like to be, and why?

Send your answers to Computer + Video Games, Thunderbirds Competition, Priory Court, 30-32 Farringdon Lane, London EC1R 3AU. The closing date is December 16th and the editor's decision is final.

## DEARBLECTIONS

d been almost four weeks in a hospital bed, but it was worth it for the information. I'd also had plenty of time to plan my next attack on the Bug Hunter Recreation Room. It was an idle comment by Otiss that gave me the vital

The drinks machine was borrowed from the Was borrowed from the Royled Paradise Club \*down the road. A nice big machine with plenty of room inside for both myself and my bandages. Bribing a small droid to wheel the machine into the room — (You need'n't try to put that on expenses! — Ed.), I got my second look at those was some property or the second look at those was property or the second look was property or the second look was property or th

daredevil Bug Hunters.
They were all gathered around a table near the far side of the room where B-Con was trying to teach them how to play cards.

"But your cards only have one spot on them. and mine have seven," Big Red was complaining. "You said that the more spots a card had the better it was, and if it had a picture on it, then it was better still."

"Well, yes, normally. However, if you'd been listening properly, you'd have heard me say that the Aces are special, and have the highest value of all," replied B-Con, controlling his obvious exasperation.

"I was listening," said Big Red. "I've been told that my hearing is very good. Only you didn't tell me that the Aces only have one spot." "Oh, good hearing, eh?"

queried Otiss. "I seem to remember you having very bad hearing when those C+VG readers were phoning up about the Manic Pacman program for that Commodore 64 of yours. It's not really surprising either, given the amount of garbage at

the end of that listing in the October issue."

"My hearing is perfectly okay," insisted Big Red. "Unfortunately, I seem to have misplaced the Manic Pacman cassette. I've a nasty feeling I used the tape to record Big Bertha's Bathtime Ballads. I typed the whole Manic Pacman listing in myself recently, and it doesn't seem to make any difference if you just stop difference if you just stop difference if you just stop

after typing line \$106.

"I think some people
may be having trouble
with the longer lines,
such as 38 and 280,
which are shown in the
listing as being more
than 80 characters long.
So, you've got to miss out
the space after the line
number, and type in
abbreviated commands,
such as 'P' and
SHIFT-'U' for POKE

"Anyway, if everything has been typed in according to the listing, then the program should work."

"Have you two quite finished?" enquired B-Con, dealing another hand. "Good, then maybe we can stop changing the subject and get on with the game. I do believe I'm winning."
"By the way," murmured

X. All heads swivelled towards X. They always did when X spoke, simply because he didn't say much, so when he did speak it was usually fairly important. "I don't want you to think firn trying to change the subject. Only I wondered whether anybody would be diffused to the work of th

"I knew it," gloated Otiss. "Power. That's what it is. I told you they'd break eventually. All we had to do was hold out for long enough and they had to give in. You see they need us. We're not

entinued on page 94

just your common everyday service robots. I'm ... I mean WE'RE better than the rest. Next time maybe you'll listen to me, instead of ...

"Have you taken a look at this machine," interrupted B-Con. "It's quite unusual. Look at these drinks ... Tequila Sunrise ... Hawiian Punch..."

"Not exactly a tasteful collection," said Otiss. "However, it's a lot better than before. Of course, if we continue to ignore them, they'll probably buy us yet another machine, or possibly something

much better altogether." "I don't care what it tastes like," boomed Big Red. "I'm thirsty. I could drink an ocean, but I'd probably start rusting.

Here, let me have one." "Hold it, lead head," shouted Otiss. "I got the machine, so I'm going to be the first to use it. Out of my way B-Con. Now then. I think I'll try this unusual concoction. down at the bottom here."

I felt something hit the back of my neck "Funny. Nothing happening. Give it a kick

Red" said Otiss "DON'T do that!" B-Con warned, "Remember how the last machine got

broken?" Don't try and tell me what I can and cannot do," warned Otiss, "You're not even fit to print a Spectrum listing correctly."

"There's nothing wrong with my Spectrum listings," B-Con objected. "Oh no? Well, why weren't the graphics

converted in the listing of Moon Buggy in the October issue, so that people could understand what to type?" "They were just the

normal Spectrum userdefined graphics," insisted B-Con. "All anybody has to do to find out what to type is to run the program with just lines 112 to 117 inclu sive. Then, if they print out the graphics characters 'A' to 'P', they'll be able to see which is which

"Well, I still think it would have looked better if you'd converted the graphics like you're supposed to," Otiss

informed him, "Now then Big Red. Why haven't you kicked the machine yet? "I'm not going to do

anything until you apologise for calling me a lead head," Red said

"Don't be stupid," said Otiss. "I was only telling the truth. You're made of a metal compound, just like the rest of us.

have metal in it. So why shouldn't I call you lead head? Suddenly Otiss, who had

been rolling away from the machine, came charging towards me. There was a loud crash, the plastic cup dislodged itself and was

immediately filled by five cup-fulls of steaming liquid. "Before you do anything, I'd like to know

if Big Red's excellent hearing heard anything just now," said B-Con. "What? You mean a

"Well, I'd have described it more as an 'Uggghh' sound, but you're close," confirmed B-Con

"No. I didn't hear anything," said Red. "Now, I think I'll have the Teguila Sunrise second from the top. Here

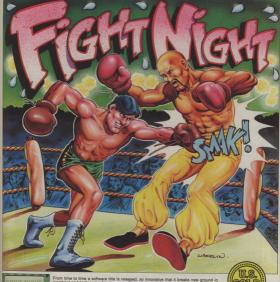

goes ... "Say, Otiss, What does yours taste like?" Red asked, a slightly puzzled expression on his face. "I would have sworn mine was tea. White with medium sugar."
"I knew it," shouted

Red, and gave the machine a hefty kick. The machine didn't seem to pleased about this and decided to fall apart.

I knew the four faces staring down at me were

less than pleased with Therefore your head must sort of 'Arrrghhh' type "He looks remarkably sound?" Big Red familiar..." I heard enquired. someone say as I passed

## Nice Identity. Shame about the Password.

It's a unique combination.

Your Special Identity Number and Personal Password. The valuable key to huge databases teeming with activity, set on our Mainframes across the nation.

On Micronet 800, you're a valued individual, adding your own special flavour and personality to the database.

Take our exciting new "Gallery" - You control your personal screens for all to see. The intriguing "Chatline" public conversation service gives you freedom to express your views and meet some remarkable people.

All part of a tremendous Communications section that networks you to 60,000 Micronet and Prestel users across the country. Try Teleshopping, or interview celebrities live on "Celebrity Chatline" every Wednesday night.

And there's FREE (& instant)
National Electronic Mail, plus International Telex, and the Contact and
SwapShop bulletin boards.

Get computer news first on Micronet's daily (and controversial) "Newsflashes" and read up on the latest reviews and courses. Feast from our regularly changing menu of programs to download straight into your micro - absolutely free.

You also get access to Educational Computing's "School Link" and Prestel's huge 300,000 page database, including world news, business & share bulletins and optional homebanking. For only £16.50 per quarter, that's less than the price of a daily paper!

The only accessory you need is a Modem, to get the best value for money around in micro communications.

Fill in the coupon for the full facts and send to Micronet 800, 8 Herbal Hill, London ECIR SEJ. But be warned, Micronet 800 is a "living" service with ever-expanding features. So maybe you'd be better to call in at your local Micronet 800 Action Station. There are thousands of Micronetters waiting to meet you!

## DAMNED **COMPUTERS**

may surprise you to learn that many of our most famous pop ested in computers and computer game So, at last, computer games are becoming hip rom the stars of the music business, of course n't you ever wondered what Nik Kershaw plays w bedroom at night

ho would think that someone with a name like Rat Scables would have fun playing with a Dragon 32? Fans of pop group The Damned may be surprised to hear that Rat's favourite pastime is playing the best sellina Chuckie Egg on his micro - that is, when he isn't collating details of the band's activites and details of their latest releases. Rat 29 whose real name is Chris Miller, also

loves arcade games. "I'm a great arcade game freak and I especially like the boxing ones. My favourite one, though, is Popeye, which I started playing on our trips to America two years before it was released here"

Other favourites include Kung Fu and space games. "You know, the ones where you get a load of speakers up your burn!" No wonder one of the band's recent singles was called Grimly Fiendish!

The space age fixation

shows up, too, in the working title of the band's current album, Flyovers from Mars

Mr Scables has a serious use for his micro too. "I use it for listing all our records and information on singles including the highest chart positions, were where they recorded, the producer's name, how many we've sold, when we released

them and so on.

"I update it whenever necessary so that at any given time we can produce details of things we've done and run it off for whoever wants it, on a computer printout. The great thing about it is that it's so good at information storage - just like a filing cahinet Rat used the Dragon a

lot in the days when he used to run a band. At that time, they had their own merchandising company making things like t-shirts and in true form, he used a stock control program to help things along.

Ho alen reckons computers, in a way, help heat the system. Someone can always crack the uncrackable. Computers are having

their effect in the recording studio, too. At the band's studios, all the sound recording and mixing details are transferred onto diel

Things like frequency, noise levels and other technical details are backed up to disk, which means that 48 independent mixes can be stored on one disk using the SSL (Solid State Logic) system But when it comes to

programming. Rat isn't interested. "Why bother? Programming is so slow, it's not really worthwhile." However, he did give

Basic a crack, enrolling at West Kensington College for a six week course. "It was really good value, only £8," he says. "But being in a band and all that. I missed the third lecture and totally lost track of

Playing with micros must run in the family. Even Rat's dad, whose love of music encompasses Wagner rather than rock, keeps his record collection up to date using an Atari, "He's an accountant but he's into Wagner in a big way.

Another home micro fan is Dolphin Taylor, from Spear of Destiny, However there is one problem on the horizon, "My Amstrad CPC464 wakes up my airtfriend with its bleeping. said Dolphin, who likes to play with his Amstrad in the middle of the night.

"We've had a few rows about it, which is ironic, as it was her idea to get it in the first place." "In computer buff terms

I'm a comparative novice. but I got into it originally of because the computerisation of recording studios, which I find very interesting," he

Will he upgrade to the disk version? "It depends.

for the tape version and the loading time doesn't bother me, even if it is slow. But I do have a 10-year-old friend who's disgusted at the speed of it and thinks

it should load a lot faster. An artistic soul, Dolphin likes drawing on the Amstrad, plotting sets of numbers then seeing what comes out. "I find that quite relaxing," he said. "I'm not exactly much of a maths

person He's also busy "wading his way through Basic. "I do charts and things but I haven't written any original programs," he says. "I like playing games on it, particularly the Wild Bunch, a western-type shoot-out game where you play poker with the town bandit. Other ones I like are sporty ones like football managers and Tennis. I'm not really the type who likes blasting aliens."

At Virgin, Heaven 17 members Martyn Ware them," he laughs.

owning BBC Bs. Manager Keith Bourton

filled us in on the details. "Martyn uses his BBC for loads of interesting things including accounting. He's linked into Prestel, and has a banking system which lets him smuggle money north of the border. It lets him do amazing things with his money at the Bank of Scotland without even

touching it!" Martyn is a former computer programmer and he even booked his holiday in Venice using the BBC. He's a regular consumer of computer magazines and software, and knows too much about it for his own good He's also got a Spectrum, and he's a real buff. He bought me a Spectrum for my birthday so now he's trying to educate me on it." Two of them in the band

are really into it all, and their came across as the manager is desperately technocrats, with band trying to keep up with

lan Craig-Marsh is another ex-programmer. When we did our last LP, How Men Are, (which features a 40-piece orchestra) he did a bar chart with all the costs involved in making the album including the cost of the producer, engineer, studio and everything, so

we can see where we've spent all our money. Much to Keith's relief, vocalist Glen Gregory is illiterate." On asking for a word with Martyn, we were told he couldn't oblige as he is "all quoted out and is afraid he will be perceived as a musician who always

talks about computers." But this IS a computer magazine...Oh well, on to someone who isn't quite so shy

The Rolling Stones' Bill Wyman is well known for cataloguing everything on his micro and will soon be writing a history of the Rolling Stones on it, according to spokeswomen Kelly Pike. At the time of going to press. however. Wyman was on the beach in the South of France and, despite repeated efforts by his record company, he couldn't be hauled off it to come to the phone.

Bob Last, who manages Human League, Scriti Politi and ABC through his firm Tunenoise, is also a great micro fan and at the last count he had an Epson PX8 portable, a BBC B with various add-ons, Spectrum Plus and two Apricots, which all help him to keep the bands' affairs under control.

"I use the Spectrum solely for games at this stage although we have a small demo studio and we're working on music software using the Spectrum, doing digital sampling. Most music software is certainly useful," he says.

"Knight Lore is my favourite game, although after two weeks of playing it, you get a bit fed up with it. I use the BBC for games but only ones on disk, as tape based games are a nain'

"I also do home banking through Prestel and electronic mail using Telecom Gold as there are no games for the Epson.

"Lots of people who buy records also by computer games - they're the same sort of people and the attraction of micros for me was the fact that our business is concerned completely computer with entertainment of all

kinds."

Singer Kim Wilds

Bob says his various clients use micros for recording, with Human League having done one of the first electronic albums. The band's lead singer, Philip Oakey, is also a committed micro freak who owns a MAC, Atari, Spectrum, QL and Tandy.

"Acornsoft games are fairly reliable," says Bob. "Aviator is a good flight simulator but I don't like Elite as it's too much effort. I prefer the text

adventures. My other favourite games are Jet Set Willy — if I'm in a bad mood, and Fighter Pilot, the Spectrum flight simulation program."

Elite, however, wins

hands down as Chris Cross's favourite game. A member of Ultravox, he owns a BBC and although he likes playing games he mainly uses his BEEB to compose and record music using the UMI system.

Chris Sievy of Chris Sievy and the Freshies wrote a game for Virgin called The Bizz for the Spectrum 48K. "It contains eight songs by us including "I'm in Love with the Girl on the Manchester Virgin Megastore Check-out Desk, — one of our many flops," says Chris modesty."

The Biz" also features an interview with Chris and one of his greatest fans. Frank Sidebottom, who now has a record deal of his own. The inteview guides Frank on how to get into the music business. and the interview itself takes the form of a game. "It took me 18 months to write and the game encompasses everything you'll meet in the music industry," says Chric

"The interview is a piece of software within an album, really. It also has a competition in it, and from that we chose some kids who will be recorded on our next album. So we might find the next George Michael — you never

know!"

Chris's band also did a single for EMI called Camophlage, "the world's first game on a pop record," says Chris, who began featuring games on records in 1981. "On the Bside were three programs for the ZX81 which consisted of graphic displays which went with songs. Two of the games, one a 1K and the other a 16K version, were called Flying Train, and a Spectrum version of this game was put out on its own through Manchester base Random Records.

Chris, a seasoned home computer user, owns a ZX81 to see how much he can fit into 1K.

Although the band has never had any big hits, they have had 19 singles out on home micros including Curt Smith of Tears for Fears, Stuart Adamson of Big Country, Marilyn, Steve Winwood, Brinsely For of Asward, Stuart Copeland of the Police, Steve Hillage and Dave Greenfield of the Stranglers.

Strangiers.

Jaki Graham, whose single Round and Around was a big success, has an Atari Video machine and is thinking of buying a Spectrum, and Kim Wilde is

also into home machines. We couldn't get hold of the ones who were on tourin seclusion/on holiday but rest assured there are plenty out there! A spokes man for the band Marillion best summed up the situation saying: "Mark Kelly, Marillion's keyboard player, has one and he takes it everywhere with

Chris Sievy, of Chris Sievy and the Freshies.

11 or 12 different labels, him, but nobody knows nine cassette albums, plus what it is and we can't find six one hour video with a him to find out..."

"I like playing with a micro as it's like having an alien being from another planet. If you do something wrong, it tells you, and it's very educational. I have a son of six and a girl of five and they doodle for hours on them;" says Chris.

Many other personalities in the music business have

## NOISE **OF ART**

The leaps and bounds in technology have radically changed the way music sounds. Mainframe members, Murray Munro and John Molloy, give you a guided tour of a modern musician's instruments.

computer. Well, we've moved on a bit. We now have a recording contract with Polydor Records and our first single is out and about. It's called Five Minutes and uses the computer almost exclusively for all the music except lead lines and vocals. And we've found ourselves pitched into the world of commerce in a big way because we are the music specification writers for the company Greengate Production which makes the DS:3

We've been asked to write this column on the subject of computers in music. And since we are very proud of our efforts in this direction we are logically - going to start with our own scene

viewed as part of the general picture of computers in music Micro-computers have

found many uses in the field of music. The main notes at once gives the areas are:

Sequencing: Sampling: Composing: Control of percussion were made on ments (More on MIDI next Digital month); Sound synthesis and control of sound in many countries of the mixing consoles in recording studios.

Wo have had experience of all of these and will deal with each of them in the coming months. Sampling and Sequencing are closest to wishing to hear what can our hearts, of course - so be done with the art of we will briefly describe our own DS:3 device in this introduction to the subject.

The DS:3 is a printed cirucit board add-on for the Apple II series of computers. We chose the Apple for two very good four-track recorder in a reasons. We all had home studio. Apple's, albeit old and battered, and the machine has very convenient slots for peripheral boards thus personal computer making life much easier for the designer of the professional use

eet Professor Boffin. He's the brainy bloke who's going to beat, batter and baffle your brain in another great Computer + Video Games competition.

He's the Star of Boffin, the BBC smash from Addictive Games.

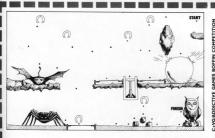

And, thanks to Addictive, we've got a games television to give away to the person who can solve our brainteaser based on the Boffin game. The ten runners up will have the choice of any game from the Addictive

Printed on this page is a diagram of one of the Boffin screens. In the game, Boffin must pass through a series of caves as quickly as possible by destroying all the unlucky horseshoes in each cavern and then touching the resident owl, guardian of each cave.

What you have to do is work out the quickest route through the cave by joining up the dots. If it matches the route sent to us by Addictive Games, you're in with a winning chance.

Send your entry, together with the printed form, to Boffin Competition, Computer + Video Games, Priory Court, 30-32 Farringdon Lane, London, ECIR 3AU. The closing date is December 16th and the editor's decision is final.

You only need a 'phone, a home computer, a modem and a little imagination to be able to transport yourself to another world. Marshal M. Rosenthal shows how . . .

OMPUSERVE is one of the largest and oldest of the telecommunication networks. Many an adventurer has cut his or her teeth here. One of the advantages of the interactive games on Compuserve is that many "sets" of them can occur at once. In fact there are often five or six different groups playing the same game on the board at one

time. Space War is a good starter game, perfect for the beginner. One to eight people can participate simultaneously as they attempt to attack and destroy their enemies. Each player controls a spaceship and must destroy all the other players.

The graphics consist of symbols that represent the various planets and other players.

Space War requires good nerves and quick decisions. I found this out the hard way, by getting blown up repeatedly. You can form an alliance with another ship, but ultimately you'll still have to get rid of him. Not exactly a situation that breeds co-operation.

The MegaWars series is the big time game in the States, in fact Compuserve sells a comprehensive manual to use with it. MegaWars One is the least complicated. Up to eight people can square off against each other in a real time

space battle that uses two dimensional graphics similar to Space

MegaWars Two is much more sophisticated, and deadly. There are two teams of four ships each. Each team tries to capture as many enemy and neutral planets as possible. Phaser weapons are available, as are Photon Torpedoes. Good thing you have shields! MegaWars Two also features colour graphics

Entity is the "handle" for 16-year-old Steve. A high school junior, Steve logs on at least twice 2 week, more if he can find the

"I find the challenge of Mega-Wars exhilarating," he says. "It's not an easy game to master it requires patience. I enjoy the combat of it, part of the fun is trying to "psych" out the other players, and finding out whether they have the stuff to take me on. There was a time when my mom thought a light late at night in my room meant I was up studying. It's too

bad that she knows better now!" Steve logs on at night because it's the best time to concentrate on playing. "That's when I feel really sharp and quick, itchy trigger fingers you know? MegaWars gives me something fun to do late at night. Besides," he adds. "I'm not spending nearly as much as if I was running back and forth to the arcades. And I'm having a lot

more fun, too." "Strategy is very important," says Captain Alfo, speaking about MegaWars Two. But I can't get through his polite but firm refusal in revealing the secret of his con-

"Part of it I will tell you," he says. "I sometimes sit down and plan my long range moves out, then contact other friendly players by electronic mail. Good communication is one of the most important elements in maintaing a good

stop and reflect on strategy once you're behind the cockpit of a spaceship - that's when you need to let your reflexes take over." He does admit, with a sheepish grin, that "Sometimes I'd rather blast em than be diplomatic

Alfo is a dentist when he's not blowing up spaceships. He says that the Captain is more of a fantasy role, not like his true self at all

Does he let other players know what his profession is? "Are you crazy," he says. "Can you imagine the reaction of one of my Mega-Wars victims if they ever sat in my chair and watched me come at them with sharp, pointed instruments?

A totally different game is Sea-Wars. Here space is out in favour of the ocean. You can play against the computer or three other opponents. The object of the game is to sink all of your enemies' ships by commanding your armada with skill and daring.

There is a special War Room mode where you can meet and talk to other players, as well as your upcoming opponents. This is a good place to get tips from those more seasoned. As in MegaWars, you can enter the game as an "observer" - monitoring the action around you in order to become more familiar.

Salty Sam is willing to give me a few pointers. "First off," he says, "keep on the move. Never let the enemy get a fix on you because you kept in the same place too long. And control those killer instincts!" he adds. "Make sure you aren't being suckered into a

Sam is very secretive about his true self. "It's not important who you are "out there" in the real world when you're here, shaping your own reality the way you

choose." He proudly admits that he's no landlubber, and was "You have to hooked on board games long remember that it's before he went on the network. I not just you out asked what's so appealing about there all by yourthe sea? "No funny green men," self," he adds. "A he snaps back. good set of team The Plato Homelink Network mates will help

has been around for over 10 years. and features outstanding graphics and information capabilities. As might be expected, there usually is a catch when you say something

#### CONTINUED FROM PAGE 111

In this case only special and expensive terminals could be used. IBM/compatible systems could log on, but this bypassed all of the home computers. However, a recent program from Atari allows users to access Plato. The program fools the system into thinking that the Atari is a standard Plato terminal

Plato's games combine graphics with a high level of sophistication and elegance. There are over 25 interactive games on the network

Moria is one of the most popular, and is of the sword and sorcery type. The player establishes a character and then goes out in a land ruled by the laws of fantasy and magic.

Some refer to it as the world's most confusing and compelling three dimensional electronic maze, with its seemingly endless rooms and corridors

Large numbers can play simultaneously, and the player can continue on indefinitely (the game never "ends", although each par-

ticular event can be resolved). Stillbreath has been immersed in Moria for over a year. By day he does mundane work behind the counter of a bank - but watch out for him when his fingers hit

the keyboard Does anyone know about his somewhat, to put it mildly, violent alter-ego? "Nope," he says. "Fantasy is fun, but I keep it as a separate special activity. It's fun but I try not to be fanatical about playing it too often. I know the

value of money." Stillbreath started out rather poorly as a warrior. "It took a lot of time for me to become powerful. But I learned from other players, and now I'm pretty good.

He has never met his friend Allon face to face. Nor does he need to. "Allon and I travel together in the adventure and keep up each other's spirits. Sometimes it's lonely being a warrior."

Allon interrupts to point out that warriors aren't all that much help at times. "There's no substitute for a good thief!" Allon says. Why would a thief and a warrior travel together? "We don't get in each other's way," says Stillbreath The brawn can always go first," Allon chuckles.

potatoes for many an adventurer on Plato. Thirty people can logon the game at one time to form the four teams, the Kazari, Federation, Romulans and Orions. This no doubt sounds familiar to fans of Star Trek

Spacelanes is a multi-user interactive role playing game ser in the Gray Sector. This is a galaxy of open space and lawlessness where rules are infrequently obeyed, and fame and formine await the bold and daring. There are a variety of sentinent races

androids and things somewhere in between that the adventurer must face. He must develop his own resources as he maps his way through space, strange planets and unforseen disasters. Spacelanes is text oriented, but

differs radically in that there is an online referee. The designer, Pilot. monitors each ongoing game. making suggestions and arbitrating events of the group playing at that particular time.

Each player assumes a character who can buy (or steal) weapons, acquire wealth, and in general just try to stay alive - as the Gray Sector is NOT the healthiest place to be

The date and time for a game session is posted in advance. This gives players time to plan and discuss possible scenarios with each other.

I made a pact with Allswell that we'd be secret allies. A whisper mode allows you to speak to a selected person without anyone else knowing.

He and I have been displaying open hostility towards each other the last few sessions, heck, I even nicked a hit of his ear off. This by the way, led into our snatching a valuable bond off a robot messenger who had the bad luck to get in the way of our "fight". Allswell got rid of

his anger as losing pure of his ear by tearing off

title robot's head in the process Somehow I doubt that the other people around like either of us

Every session is a continuation, and your character is saved until you are able to play again - providing of course you haven't been killed recently. A lot depends on the personalities of the humans. I've heard that there are actually Empire is the meat and some NICE people in the Gray

he hardest thing about telecommunications should be pronouncing that long word. Modems are becoming simpler to use, more sophisticated and

per to boo Moderns work over the standard telephone lines, sending freque information rather than words. A protocol is an agreed system which allows both sides to understand each other. Full duplex is like using a telephone, while half duplex involves taking turns - like using a walkie-talkie. Some moderns can be set either way for greater flexibility in communicating.

The speed a modern handles data is expressed as a baud rate. The common 300 baud type sends/receives 300 bits a second, but more expensive models can also access 1200 baud, increasing unication speed four times These modems rely on advanced microprocessors to change tones into electronic signals which are then deciphered at the other end There are basically two kinds of modems to use. An acoustic modem - rapidly disappearing from the marketplace - plugs into the phone line and has a set of 'cups" for a standard headset to drop into. Its main drawback is that noise can sneak into the line disturbing the data or the heads could even fall out. But they're fairly reliable - and they LOOK the way a modern should be. A direct connect modern costs more but it

feature, as is knowing when you're "on line" Copying a program is called downloading. Uploading is the opposite, sending information out. To pass information, both sources must have similar protocol, they must understand each other. Most software programs can initialise various kinds of procedures, pro viding that the modern is equip with the capacity to handle different kinds of protocol.

A system is fun when it's easy Dorothy was asked by the Good can opener -Witch of the North what she had

the land of OZ. Throughout my electronic travels, I've discovered that one of the

computer's greatest strengths is the way it encourages communication. Interactive gaming enables many different people to share thoughts and ideas. As you play with and alongside other users. you get a feeling of being part of a much greater world, one of interesting and unique individuals. I

to use. It got pretty confusing for me, what with so many different passwords to remember.

All telecommunication networks require compatibility between their computer and yours. Each network has its own rules and regulations that govern hooking up with it. Listed below are the basic require-

#### SOFTWARE COMPILATION REVIEWS

If you can sell something once, you can sell it twice that seems to be the current motto of many software houses

It was a lesson quickly learnt by the record industry. A hit single can be included on a compilation album with other past hits and sold at a bargain price. The customer sees it as good value for money and the record company squeezes a few extra pounds out of a song.

Now as Christmas approaches, software houses are releasing their old games in compilation packs. And if you haven't already

bought any of the games included in the compilations. many do offer good value for money.

Donning Father Christmas gear, the C+VG review team has sifted through some of the compilations now on offer with a view to festive gifts

Spectrum, Commodore 64, £8.95. This package really represents an excellent deal, worth every penny, In some ways Now Games is different from most of the other packages. The games were all originally released by different software houses.

The six on offer are Lords of Midnight (beyond), Brian Blood Axe (The Edge), Strangeloop (Virgin), Pyjamarama (Mikro-Gen), Arabian Nights (Interceptor) and Falcon Patro (Virgin)

All the games are well-known and if you've already bought one or two of hem, you will be forgiven for wincing hen you see how much all six can now be bought for. Excellent value and a wise buy for the cash

THE EPIC

Spectrum, £8.95 Turtle Software The Epic offers six Spectrum games covering a variety of game styles. Titles are A Liquid Simplex

Spraymania, 3D Blood Dungeon. Snakes Alive, One Man and his Job and Moons of Tantalus

THEY SOLD A MILLION

#### Spectrum, Commodore 64, Amstrad.

Ocean, Software Projects, Ultimate and US Gold have also joined forces to release four well known titles under the name "They Sold A Million" Titles for the 48K Spectrum and Amstrad are Beach Head, Daley Thompson's Decathalon, Jet Set Willy and Sabre Wulf. On the Commodore 64 version, Staff of Kamath will replace Sabre Wulf And for the Amstrad both Jet Set

#### Willy and Atic Atac are being written especially for the project. MEGGA COMPILATION

Commodore 64, £7.95 Interceptor Games individually worth £42 are on offer here for just £7.95. Titles are Tales of the Arabian Nights, an arcade adventure packed with spells, magic carpets and dangers. Bigtop Barrey, circus action as the clown performs four deathdefving stunts. Where's My Bones? a murriared monk's search to find his

bones so he can Rest in Peace Break Fever, a graphical break dance game with music. Try to maste the intricacies of the Turtle, Donkey Kick and Headsoin. The Caverns of Sillah sets you on a mission to rescue stolen agricultural droids, and Frontline, a war strategy game. Megga Compilation regresents a nice cross-section of arcade-style

action Good value

#### SPARKLERS SPECIAL Spectrum, Commodore 64, £7.50

Sparklers Special is a "best of" the Sparklers range of pocket money games available for the Spectrum and ommodore 64. The Commodore collection has

Slurpy, a strange creature with a huge appetite who muches away at Glowbugs and Cave Birds for points. Then there's Orc Attack where Wric the Brave must kill all the Orc invaders or die, Black Hawke, an action and strategy rescue game with 30 levels of play, and River Rescue. another rescue game where scientists

The Spectrum collection also includes Orc Attack and River Rescue Added to them are Stagecoach, a perilous Western shoot'em-up where the stage must get through, and Tower of Evil, an arcade

adventure ranging over 40 rooms in search of lost treasure. Each compilation represents fairly good value, remembering that each game originally sold for £2.50 each.

#### HENRY'S HOUSE AND FRIENDS VOL ONE Commodore 64, £6.95, English

English Software has already released compilation tapes for the Atari with a lot of success. Now it's the

Commodore's turn. Volume One contains Henry's House a one-player game, Jet Boot Jack, a 10 screen platform and collecting game set in a record plant, Neptune's Daughter, a quest to rescue one of

the Sea King's daughters om the evil

Volume Two also contains Henry's House a strange decision which will surely put off people buying both tapes - and the previously unreleased Soldier of Fortune which follows a

man's search for gold in terror-ridden underground caverns.

E14.95 disc Summer Games II has been halled as THE sports simulatior Amazing graphics and realistic animation have quite rightly earned it rave reviews.

Summer Games was great but Summer Games II is better. The events covered are cycling, fencing, kayaking, the triple jump, rowing, the high jump, javelin and equestrian events. There's a choice of 18 countries you can represent. There are are opening and closing ceremonies, awards, national anthems and competitions against your

national anthems and competitions against your friends' computers. Up to eight people can share in the fun. Judy's verdict: This is great especially the high-jump, triple jump and javelin, they're my

The graphics are as good as the arcades, the movements of the competitors are very realistic and entertaining to watch. Presentation is superb. I prefer Summer Games II because of the athletics.

#### Judy's Verdict

British and former Commonwealth Heptathlon record holder Judy Simpson knows all about the skill, guts and dedication needed to compete in the world of top class athletics in seven gruelling events.

So she seemed just the right person to undertake the C+VG sports games review challenge.

Judy and her husband Robbie travelled from her home in Coventry and entered the special arena constructed in a spare few thousand square feet of C+VG's London offices to review this year's top sports games.

Judy, who owns a Commodore 64, likes

to play games in both the arcades and on her computer.

#### WINTER GAMES

▶Continued from pl1 andons the use of keybo or joystick as a means of control. Instead New Concepts wented a minature surfboard which fits over the computer

By applying pressure to the oard, real-life surfing moves can be performed. Variations in her conditions and the surfer's individual details ensure the game is different

everytime, just as every new rave is for a surfer. Before taking to the sea, the

layer must make a number of choices. Surfing gear must be selected. This depends on the player's size, weight, age and sex. Board length and weight

ust also be selected. Once the gear has been lected, the screen changes to view of the sea from the beach. The surfer must paddle out into the sea, ducking hrough the breakers which weep onto shore, and make

his way out to the chosen pair to catch a wave. At this point the screen changes to a close. up of the surfer on his wave. Points are awarded according to how the surfer performs

arious moves — bottom turn rankin, off-the-lip, cut backs. plasting, barrel rolls, 180 and 160 degree turns.

But there's the constant langer of "eating it big" and etting wiped out. The game is hard.

allenging, frustrating and, Itimately, very addictive The player's scare can be entered into the Hall of Fame alongside the name and score of the current champion player. Should the score be broken a coded message will be given and the player can return the tape to New Concepts and eceive a prize

Programmer Desmond Acenemy, 20, has almost finished Champ Skier, which again features a keyboard verlay - this time two skis. Also planned are Ski Jumper, Water Skier, Sailing.

Skate Boarder, Paragliding nd Hang Gliding. Champ Surfer will sell for round £12, including the inature surfboard.

Conversions to other machishould follow

BY TONY TACOUSHI Ring\_ring\_ring I leapt to my feet and dashed to answer the phone. Hello?

'Hello Tak it's Orlando from Aardvark." "Hello" I muttered pausing to catch my breath

Tve got something to show you. My latest masterpiece!"

"Great stuff!, what have you Tve got two games. Firetrack on the Beeb and Frak on the Electron. They are superb, the graphics are stunning, the sound is amazing, the playability astounding, the programming

brilliant, the design fabulous..." Now I don't like hype - even from the most tolented of programmers. BUT Orlando has done it yet again! Both

Firetrack and Frak are superb ieces of software. Beeb and Electron owners are usually starved of real top notch games software. But Orlando has delivered the goods with his

latest pieces of genius Firetrack and Frak. Orlando's reputation speaks fi itself with titles like Arcadian, Zalaga and Frak for the Beeb and Electron. In fact he is one of the very few Beeb programmers whose games are eagerly

awaited by proud Beeb gamesters Frak rates as a classic on the Beeb and it's set to be the same on the Electron. Your caveman has to find his way around

various scaffoldings picking up keys along the way. He also us his yo-yo to knock nasties off their ledoes as he clambers around. He climbs up and down ladders and leaps from platform to platform in his bid to gain the Make no mistake this IS NOT

just another platform game this is THE platform game. There are many sneaky twists and solving the screens will need some real enuity on your part.

To make it more playable than

he Beeb version there is an option to start on a higher level. You can also alter the background and use of colour to uit your own toste. Frak on the Electron is

everything it should have been on the Beeb. It is faster, yes faster! There is no flicker on any of the characters and that music sh THAT music is so good The graphics are identical to

the Beeb although there are 12 different screens to work through. An added bonus is the inclusion of a screen designer which allows the player to set up his own screens to play.

Frak comes on tape for the Electron and will cost you £7.90. Electron owners have been starved of good software but there is now an answer! BUY Frak, I promise you will not regret it.

Now on to the The BIG one Firetrack. This is a version of the current arcade hit called Starforce. But version isn't quite the right word.

Firetrack in many respects is etter than the arcade original. It's as fast and the sound is as good. But where it really scores. is in the graphics. The attention to detail and use of colour is superlative.

The object of Firetrack is to battle your way through an asteroid belt to a white hole. You fly over various colonies in your bid to find the hole, the colonies defence systems are activated as

you enter their terroin Their attack comes in many patterns and in many forms. Yo an move your fighter in eight directions as you zap the aliens to oblivion

At the end of each wave you incounter a head that floats orizontally across the screen and you have to pump it full of blaster to progress to the next

The graphics and pace of action really make this game The asteroids scroll down the screen and the aliens filter in from all sides - sometimes in sequence, sometimes at will. The detail and colours are stunning and the action just never lets up

as you get deeper into the game There is over 15 minutes of different scrolling backdrop. I defy anyone to reach the White Hole at the end without some real marathon sessions on the keyboard or joystick. Even I ouldn't crack this baby

Orlando sums up Firetrack in is own inimitable style: "It's got the fastest kill rate ever. It's just total destruction!

Firetrack should be available from the middle of November on tape and disk (£8.90 and £10.90). A Commodore 64 version is also due sometime before Christmas.

Good news for all those MSX and Amstrad owners who have been frothing at the mouth awaiting conversions of Ultimate's classic games for their machines.

Well cheer up and get down to our negrest software store. Knight Love, Alien 8 and Nightshade are all now

available for the MSX. And Ultimate assures us that all the features found in the original versions of the game are all here to delight and tantalise yo And for Amstrod addicts

there's now Sabre Wulf, the thart topping jungle adventure. for you to get you teeth into. We know it's vulgar to talk about money, but here's what ou'll have to pay, Knightslore, Alien 8 and Nightshade will set ou back £9.95 and Sabre Wulf will cost £7.95. But it's near Christmas and you never know what Santa might bring you...

I say chaps, have you had trouble getting hold of the adventure game, The Secret of St Bride's? Up to now it's only been available by mail order. But not to worry . St Bride's School, the software house behind the game, has signed a distribution deal with Audiogenic.

St Bride's, which must be the world's most unusual software house, is a school on the west coast of Ireland where grown women can pay to find out what school life was like 50 years ago. Strange, eh? Lately the school has been producing game

St Bride's headmisstress. arianne Scarlett, tells us: 'Our aim is to build St Bride's into one of the foremost software houses in the British

Calling all Atari owners... Calling all Atari owners Fighter Pilot from Digital Intergration is zooming your way. This flight simulation runs in 48K and will cost £9.95 for cassette and £12.95 n disk. Over and out.

## SOFTWARE SERVICE

Seen a game you'd like in this issue? DON'T MISS OUT — You can order today from Computer + Video Games super new SOFTWARE SERVICE.

It's the easiest way yet of buying all your favourite games — and every month there's a unique offer or competition open to everyone who uses the Software Service. This month, three lucky readers will win £50 of free software — the choice of software is left up to you.

But that's not all — for every game over £5 we give you 50p off (just deduct it from your cheque/P.O. — if the game costs over £10, deduct £1).

All YOU have to do is fill in the coupon below and send it off to C+VG — \*ALL POST AND PACKING IS

So send away today and you could win yourself £50 of the games of your choice. DON'T FORGET TO STATE THE MAKE OF COMPUTER.

RING OUR HOTLINE TO CHECK ON AVAILABILITY OF LATEST GAMES 731 4607

Take your seats for another feast of fantasy at your local

Science fiction, sword and sorcery, pirates and fairies are the ingredients the movie moguls are serving up on the silver screen to tempt you away from your computer

and down to the local emporium of celluloid sensations.

One film — The Goonies — has even been turned into a computer game by Datasoft as you will have no doubt read in this month's C+VG.

So as the lights go down, the music softens and the screen flickers into life, C+VG presents a guide to what will be coming your way over the next few weeks.

#### GEND THE GOONIES

Ridley Scott, the man who ternorised us with Alien and thrilled us with Blade Runner, is back with a fairy tale of good and evil, light and dark. Sounds a totally new idea.

doesn't it?

Legend is set in a woodland where humans and forest creatures co-exist in a state of extreme happiness, maintained by the presence of two unicorns who know only love and

But the evil Lord of Darkness

— cue for loud boos and hisses

— who lives in his

subterranean castle away from

sunlight, wants to destroy all this by capturing the unicorns. Goody, goody Princes Lila is even won over to become his Queen of Darkness. Will her pal, Jack O'the Green, save the day? Will the sun ever shine on this paradise again? Does anybody care? Pass the poptorn

Summertime and the living is uneasy. Big shot developers threaten the peace of a small d seaside town in America. But not for long, that is. The Goonies are out to stop them.

The Goonies, a gang of kids with names like Chunk, Mouth and Data, find an old pirate map and they set out to find the treasure which can help

But skeletons with swords, a booby-trapped underground s passage and a murderous exconsict make life difficult for

The Goonies.

The Goonies is based on a story by Steven Spielberg, the man who apparently can do n

wrong at the box office.

His track record is
currently the best in
Hollywood, with such
classics as Jaws, Close
Encounters of the
Third Kind, ET. and

Raiders of the Lost Ark. All worth checking out for sheer escapist fun.

#### COCOON

Cocoon has already been dubbed as Close Encounters meets On Golden Pond. Vetrean Hollywood stars such as Don Ameche have been dragged up to play a group of elderly people living out their last days in a Florida home, browning gently in the sunshine.

All is nice and tranquil until a group of aliens called Atareans move next door. They have come to reclaim friends they left behind on earth 10,000 years ago, cocooned on the bottom of the ocean. The aliens use their swimming pool as a temporary store for the cocoons.

But, unknown to the aliens, the old folk are using the pool for secret swims. The effect on them is dramatic. In all but looks, the elderly become young again, rejuvenated by the mysterious cocoons. Cocoon is directed by Ron

Howard — remember him as Ritchie in Happy Days? Don't be put off because the film is about old people. The message is: Age is just a state of mind.

#### MAD MAX - 3

Max is back, mean, moody and magnificent as ever. championing law and order in a post-nuclear nightmare.

Civilisation has been destroyed and a new society is growing in the desert centred

on the city of Bartertown. The Thunderdome of the title is a place where differences are settled - violently. It's a

sort of "hall of justice" It is into this arena that Max - played by heart-throb Mel Gibson - arrives. The action is spectacular, with a stunt studded finale

Sounds one of the best films around at the moment.

Great viewing even if you've not seen the two previous films.

#### LIFEFORCE

Tobe Hooper - he of Texas Chainsaw Massacre notoriety has launched an arrack of vampiric space aliens on London, hell-bent on draining our life energies in his new film Lifeforce.

Not surprisingly, panic ensues. NATO forces battle bravely to save us The special effects are said to

be revoltingly spectacular. But the critics' opinions seem to be

What a load of space rubbish!

#### **JEWEL OF THE**

Michael Douglas and Kathleen Turner are reunited in The Jewel of the Nile, follow up to the highly successful Romancine the Stone.

Jewel is another dose of wild adventuring with encounters

and various villains. Sounds

#### RED SONJA

Feminist sword play from Brigitte Nielsen as Red Sonja, a character created by Robert F. Howard, writer of the Conan

Sonja, a simple farm girl believe that and you'll believe anything - falls foul of the

menacing Queen Gedren and her marauding army. Sonja vows vengeance and with the help of Arnold Schwarzenegger, forsaking the part of muscle-bound Conan to play muscle-bound Kalidor.

#### that's just what happens. THE BLACK CALILDRON

The Black Cauldron is a sword and sorcery cartoon from Disney involving the evil Horned King's pursuit of a pig with visionary powers which are Black Cauldron. But teenage pig-keeper Taran is determined that won't happen.

The plot sounds quite strange but surely Disney wouldn't spend five years and 25 million dollars on a duff film. Would they?

#### THE BOY WHO COULD FLY

Is it a bird? Is it a plane? It's not even Superman. Yes, it's the boy who could fly Not a lot known about this film as yet except that it's

being made by Nick Castle and Gary Adelson, who brought us The Last Star Fighter.

#### THE EMERALD FOREST

John Bootman's new film is supposedly based on the true story of a Peruvian engineer who finds himself -

kidnapped by Indians 10 years before - as leader of a local mile

Sounds a little like a chan called Tarzan, to us. Lost as a child and later ends up as king of the jungle. Probably coincidence . .

C LAST STARFIGHTER Fancy seeing a good movie? Want to get a good video from your local tabe store? But you don't know what to watch. right? Well stop getting all flustered. C+VG broudly presents a rapid round up of what's good - and had - on the hig and small screens. Read and you won't have to watch 300,000th re-run of Wizard of Oz this Christmas!

If you've ever wondered - and which of us hasn't? - how King Tutenkamun died, this film offers a stupid explanation. Ben Murphy, from Alias Smith and Jones plays a perpectually puzzled professor of archaeology who unearths King Tut's coffin and brings it into

the next classroom session back at his American university. During the unveiling of the coffin, the corpse within is accidentally given ten times the normal does of x-rays by a stupid boy with an irritating

cackle. The worst thing about bad films isn't that they're implausible, senseless and cheaply made. It's that they're

so deadly dull Although Time Walker now embarks on an all-out imitation of several much better films. including Raiders Of The Lost Ark, Halloween II and even Psycho, it is a dreary piece of clodhopping hokum which wouldn't scare a child of six.

Is Brazil actually funny? To be more exact, is it even a comedy? The critics probably got it right when they described this astonishing film as a "laugh-a-minute

Terry Gilliam, the man who made Time Bandits, and who previously did all the weird animated drawings for Monty Python, has created something close to a masterpiece here. You

could call it 1984-with-jokes. Nervous-looking Jonathan Pryce plays Sam Lowry, a minor clerk in a huge Ministry Of Information, who is haunted at night by dreams of a beautiful woman. One day he catches sight of her in the flesh, and desperately tries to track her down using the Department's antiquated computer system.

When he finally meets her, she

turns out to be a terrorist devoted to breaking the tyranny

of the Government. Another anti-establish figure in this world run bureaucratically bonkers is Robert De Niro as an illegal freelance central heating engineer. Dressed from head to foot in SAS-style combat gear. he swoops into Lowry's flat. mends his heating and vanishes away down the side of the building with all the military precision of a commando.

Oh, and in case you're wondering about the title, it's nothing to do with steaming jungles, just the name of the tune which simmers along in the background throughout

Never mind all the ballyhoo over the recent film of Orwell's 1984. Brazil is a far more disturbing, moving, hilarious and imaginative effort altogether. I didn't know whether to laugh or cry. See it!

If ever there was a film made specially for shoot'em-up fiends, this is the one. The

Not really being one of the lads, Alex gets more fun from blasting nasties on the Starfighter game which stands on his front porch than he does from screeching around in his

friends' truck. One evening. Alex achieves his highest ever score on the game, and there are screams and wild celebrations from neighbours as he does so. Now this may be a daft fantasy film.

but really!!! Anyway, not long afterwards he is visited by a jovial old chap in a rather futuristic looking sports car. Gullible Alex jumps in, and soon finds he is on his way to the planet where the Fyland live intelligent aliens with huge

bald foreheads. The old fellow, you see, is called Centauri, and he deliberately planted the Starfighter machine on Earth in order to find out which Earthling would be best suited to becoming a real nastyblaster. Sure enough, even now the dark forces of the Kordan are massing to invade Strangely. Alex shows little enthusiasm for life in a transgalactic multi-storey of park, and insists that Cen take him home.

Jonathan Pryce from Brazil

# Mailbag,

• I have just bought your latest issue and, having just read THAT letter from Stephen Graham, I have decided to reply. I) I have found that your letter's page is quite acceptable. It seems to me that Mr Graham wants a magazine that would give over half its pages to letters, and what would be the point in

that?
2)No Top Ten'? Gosh! Wow!
Amazing! So it was missed for
one month, maybe there was
something more important to go
in its place?

They seem to be quite acceptable to me, and considering the C+VG supports more than one computer, I think that the gam that do get reviewed are reviewed extremely well.

of Competitions. I would have thought that it was obvious to even the simplest of intellects! The whole point of competitions is that if you win, you don't have to buy the game, you get it free. Can't Mr Graham take a joke? That is what "Don't Buy

This' obviously was!

If it is wrong to copy ideas, then how come Elite, which I personally think is the best BBC game of all time, is now coming out on the C647 If that isn't

copying, what is?

Or, if you wish, who brought out the first home micro?

Whoever it was; why don't they sue all the other companies, as it is obvious that they all copied

the first company's idea, and brought out home micros of their own?

6)Maps and tips. Rubbish? How dare he? What about the Hitch Hiker's Guide to the Unitiverse map? I haven't seen that anywhere else? There is no better Adventure column and

what is wrong with plain tips? There are those of us that would like to beat a game without cheating, you know. 7) Typed-in programs. The programs are mostly Basic because that is what all of the

8) Layout. Seems OK to me? What is the perfect layout? Now I'm not saying C+VG is perfect, but there is a small page at the front, with the title contents, or hasn't Mr Graham bothered to read that far? 9) Games News. See my reply to

9) Games News. See my reply to question two. 10) Games they refuse to release. Surely, they refuse to release

treem occurse it sent weetnessue.

110 C+VC said they had an
as a sid they had an
so did Your Computer, seems to
so did Your Computer, seems to
so that the company who
brought that game out, merely
tried to get more publicity, so
Mr Graham should be having a
go at the company, not C+VC.

121 The Max Headroom
the public the company of the
interview was very good, and in
true Max Headroom style, and

it certainly took more than three minutes, or else Mr Carlaum just looks at the jictures!

13) Graphics packages. If C+V And reviewed more packages there would have been less room to show what the ones they did review can do.

14)What is Mr Graham going on about? Earlier, he said that C+VG contradicted themselves.

but now be is doing it himself! He said that other mags have 89-100 pages of editorial, while C+VC has 70-120 pages, not if you average them out. You should find that the other magazines have 94.5 editorial pages, while C+VC has 95. Now, while Vi page might not seem a lot, it is quite large for an A4 size piece of paper. 15!Hall of Tame. See question

two again.

16) I will definitely buy your magazine again, in fact, after seeing your secret plan, I have put in a monthly order for one at my newsagents. And who wants to be serious about everything? If you take everything serously, you would

have a very long and extremely boring life.

I find this magazine worthwhile, and have done since I started reading it from issue two, it certainly isn't robbing its readers of anything, more likely

two, it certainly isn't robbing likely people are robbing themselves, of a good read! Thanks C+VG, long may you print! Martin Ward Orpington Editor's reply: This was just one

of the hundreds of lettlers answering Stephen Graham's epic criticism of C+VG in our October issue. We could print more, but Martin summed up many peoples opinions. It's good to know that Mr Graham is one of a shrinking minority.

 I am writing to say your old magazine was fab. But this new one is mega-fab! The new C+VG is well presented, I loved the cover, the new Bughunters and Psi-Warrior.

Right. It must stop licking you boots. This is the lat anniversary of me buying your magazine. That Thompson Twin game tempted me to buy it, but after a year of preserving, it still doesn't work! Can I get a decent conv<sup>3</sup>

Also, next time you see Stephen A. Graham, smash his

face in.

Does anyone have Pokes for the Spectrum version of Airwolf. I've collected the scientist but no more than one. It is really an addictive game and I love it. Jim Greig.

Carrphilly.

Carryhilly.

Editor's reply: With someone with views like yours we can't refuse, can we? Watch Ideas Central for Airwolf tips/Pokes.

 Up until now, I have always had a great respect for computer programmers and for your magazine. I considered those people who devise programs for home-computers talented. I thought that they had a special gift, I also believed that you and your colleagues were a decent bunch of chars.

bunch of chaps. BUT, all my beliefs were shattered into a million pieces on that faited Sunday afternoon when I read your reviews in the July issue and there on page 49 was that disgusting slandering statement. I don't lay the blame entirely on your colleagues. Friebrid are the suppliers of the so-alled 'game'. Chicken Chase and the designers of that game are just as much out of line, so to speak. But when you wrote to speak the when you wrote the property of the property o

are just as much out of line, so to speak. But when you wrote this paragraph "The cockerel must defend the chicken house against hungry enemies, including hedgehogs.... All the rest of the world just fell into a blood red blur.

tell into a blood red bisizhedgehogs are meal eaters, true, but they DO NOT eat chickens alive. They are known to be partial to poultry but only when it is ALREAD' dead, it is inconcrisable to me, and say with the control of the control of the inconcrisable to me, and say with the control of the control of the inconcrisable to me, and say with the average them, that is case little hedgehog would go into a chicken house and chase after some feathery bird when there are much tastier slugs and worms in the region, which only have to be found and not

Obviously someone got their

facts wrong and may I suggest that they purchase the book Hedgehogs by Pat Morris. This book is available from the British Hedgehog Preservation Society's Headquarters.

For the moment I have not stopped buying C+VG and will continue to purchase it until either the end of the year if some reference and suitable explanation to these slandering.

words is given.
You cannot imagine the
considerable damage you have
caused to the public image of
the native hedgehog.
Laura Kay,

Middleser.
Editor's reply: We all like hedgehogs here at C+VG — sorry that our review upset yos on much, Laura. I hope we've put the record straight by printing your letter. And we'll all know better, won't we' My friend actually has a pet hedgehog in his backgarden...

With reference to Stephen A. Graham's letter in the October, '85 issue. If he wants to moan, let him do it to Zzap 64, and Crash. Here are my observations on his points.

on his points:

1) What is he on about, the letter's pages being so poor?

Can't say that I think much of his letter.

2) Can't he survive without a

Can't he survive without a Top 10, 20, 30?
 Review are terrible? Stephen, you are probably a big-headed computer freak.

4) The competitions are good, and I think Stephen is frustrated because he can't understand them.

5) A programmer's diary? People

5) A programmer's diary? People do think the same things, especially if they are good ideas 6) Type-in programs, might be for people who are skint and cannot afford games. 7)The law-out is good since they

changed the mag.

8) Crush and Zzap 64 are rubbish. You see that when you read C+VG news, it's full of

97The only change of F.B's boxing is that Frank Bruno has been filled in, and in the review C+VC stated clearly that this was to be filled in. 10 Why did you let this freak (Stephen A. Graham) take up so much room in the Mailbag? Please print this letter. Roger. G. Copleston.

Gwent:

· I would like to say something to the arcade owners who own the game Star-Force. Do you do regular checks on

the iovsticks? I find in most cases you put your 20p in the slit, press the one player button then find the ship will not move in certain directions, due to constant use

When a joystick is replaced, I have noticed that it is a fourway design. The game is totally unplayable. It needs an eightway design.

When putting your me into any machine that doesn work properly, are you entitled to a refund? This may sound stupid, but, I have put many a 10p in a machine that doesn't work the way it should Now a message to all software

houses, please, please make a conversion of this wonderful game on to the C64 Finally a tip on the game. Hit

as many question marks as possible as this will gain you an extra ship. Gary Jarvis

Editor's reply: Nice to hear from an arcade game player. Hopefully the arcade owners will heed your pleas, Gary, And you should be entitled to your money back if the game doesn't work properly. You must be prepared to make a fuss though. Let's have more letters from arcade fans...

. In reply to your request in September's issue for views of other Acorn owners I thought I had better write in. I bought an Electron in June '84 after deciding on that rather than a C64 due to the supposed compatibility of the Electron to the BBC. Now I regret it, now that I have seen that you simply seem to ignore me and my fellow Electron owners.

The BBC still gets a fairish look in, despite those complaint from the owners who are not satisfied. It is the Electron which gets left out. You admit you do not popular with your readers. How many Acorn users read your mag! Do you really know? The combined Acorn user base in the UK is around 600-700,000 which is nearly as many as there are C64s. I know it's not all your fault, but there are a few adverts in C+VG for Acorns - they do exist. The user

ases of C16s. Ataris and MSX is far less than the Acorn user

The reviews are all for the C64/Spectrum owners with the odd one for the MSX, Amstrad and BBC. Do not say there are none for the Electron 'cos there's plenty of software around and some of it is worth reviewing. Hint - when reviewing a game for many micros, eg Confusion

marks for all the versions, not I admit I tried to sell my Electron to buy either a C64 or Atari - no one wanted it. Gary Whitehead.

Editor's reply: I think you've answered you own question when you admit to trying to get rid of you Electron, Gary. And I reckon your figures are a bit high, too. But the fact remain that software houses aren't supporting the machine as much as other more popular makes for obvious reasons. We'll review Electron games when we can nersuade the maken to send or

review copies. Are you listening · We are a national charity set up to help parents and professionals dealing with Down's Syndrome children.

out there....

Our membership now stands at approximately 4,500 and many of these children seem to have an aptitude for computer games and educational programs. As a result of this, we have had several enquiries over the past year as to what is available in computer software that may be of help to parents

May I, through your magazine, appeal to any software manufacturers who could let us have lists of what is available so we can pass this on

Maggie Emsle. Downs Chidrens Association. 4 Oxford Street London W1N 9EL

Editor's reply: Please help by vriting to the above address

· I have owned my Atari 800 and disk drive etc. for over three years now and recently decided to buy a Commodore 64 to see if it really was as good as I did expect the games aspect

of the Commodore to be as good as, if not better than, the Atari which was hard to believe. I was very wrong indeed.

Not only did most of the programs crash if a wrong key was pressed but the graphics. below the standard of my trusty old Atari. One of the things which dissappointed me most about the Commodore was the so-called advanced S.I.D. chip which did not sound too advanced to me at all, especially when it was trying to produce sound effects. It also seems very unpredictable as in many musical games the sound does

tend to go way out of tune quite I did try to learn some of its so-called Basic but gave up accordingly. While Atari Basic is eight years behind the times, it supports all graphics and sound

commands and is generally constrior to Commodom Buic I think if a devoted Commodore user saw an Atari computer really working he would turn blue with envy, sell his Commodore and buy an Atari straight away. That's if the Commodore user has any sense

I have since sold my Commodore for buttons which is all that it's worth and would never trade my Atari in for anything seeing as it's the best 8-bit home computer you can

I only wish you would support the Atari as much as the other, low grade, comput If you did this, a lot more Atari great magazine Roy Lynch

at all

Editor's reply: Atari gamers are amongst the most loyal to their machines. But I reckon your comments could start quite an argument on these pages... · My friends and I are facing a

problem and we hope that you may be able to help us. We are all proud and happy owners of the Vectrex video game system. Between myself and my friends we have nearly all the cartridges that were released for the system in Australia

Due to the demise of Milton Bradley as a video game firm we were stuck with only the initial release of some 20 catridges. As you may have

gathered by now, we are searching the world for all the unreleased cartridges

We have already sent away to America and we have bought (with an incredible amount of difficulty) the 3D eoegles plus three cartridges made for the RORI

The only problem now is that our contact has left America and the firms selling the last few cartridges are reluctant to send them to us

I have been an avid reader of time and if I recall correctly you held a competition and the prize was a Vectrex light pen and cartridges. We hope that you can give us some information in regards to the light pens, its associated cartridges, as well as

If you know of any firms in Britain with these accessories we would be immensly grateful if you could send us the firm's particulars or publish them.

Editor's reply: You probably know more about the poor old Vectrex than we do, David. But maybe one of our readers can help you out. If you can write to us, we'll pass the information on down-under

· I would like to tell the readers of C+VG about a software club that I joined recently. I had been looking for a good club and Preview Software Club's advert looked promising, so I sent off my £1 hoping not to get ripped off. Four days later I received some software lists: a news letter: a form for introducing new members for which you receive a \$1 youcher. I earned four pounds in a few days. Also a £1 voucher for money off my first

But what really pleased me was when I came home at five o'clock in the morning after setting my car's engine on fire while still 150 miles from home, to find on the mat two U.S. Gold games (9.95 each): five pounds in vouchers; two letters and a package, plus a cheque for \$5 which I had sent earlier. Preview can be contacted at PO Box 87. Solibul. West Midlands B91 3UI
